Middle East Technical University

The EUROMICRO Conference and the EUROMICRO Symposium on Digital System Design (DSD) have steadily grown over the years and have emerged as major conferences in Europe. For the last two years the EUROMICRO Conference and the Digital System Design Symposium have been jointly organized. The combined event provides a high quality forum for scientists and engineers to present their latest research findings in rapidly changing fields. This year's events will continue the tradition of being a premier forum for the presentation of the latest research and development in the areas of Digital System Design, Software Process and Product Improvement, Component Based Software Engineering and Multimedia and Telecommunications.

I am grateful for the opportunity to organize DSD and EUROMICRO in Antalya, Turkey this year.

The conference will have various technical sessions devoted to keynote speakers, regular papers, short papers, and work in progress presentations. Participants registered for DSD or EUROMICRO may attend any session based on their research interest.

I would like use this opportunity to thank everyone who worked hard to make this event possible. Specifically I would like to thank participants of the PC meeting and the EUROMICRO BoD meeting which took place in Linz, Austria. In Linz we had the opportunity to decide on most of the organizational issues together. Special thanks to Oktay Turetken for his hard work, and REPINO Tours who made the connections with the Conference Venue.

I wish everyone a very good conference and wonderful time in Antalya.

Onur Demirors  
Organizing Chair
