

Empirically Evolving Software Techniques: The High Dependability Computing Project

Victor Basili

Dr. Victor R. Basili is Professor of Computer Science at the University of Maryland, College Park and the Executive Director of the Fraunhofer Center - Maryland. He was a founder of the Software Engineering Laboratory at NASA/GSFC. He works on measuring, evaluating, and improving the software process and products. Awards include the 2000 ACM SIGSOFT Outstanding Research Award and the IEEE 2003 Harlan Mills Award Computer Society. He is an IEEE and ACM Fellow. In April he received a Laurea Honoris Causa from the University of Sannio in Italy. <http://www.cs.umd.edu/~basili/index.html>
