

Tutorial B2
1:00pm-3:00pm

Fundamental Methods to Enable SoC Design and Reuse

Duration: 2 hours, including Q&As

Organizer: Meghan Le, Synopsys

Presenter 1: Phil Dworsky, Synopsys

Presenter 2: Warren Savage, Synopsys

In this interactive seminar, designers and design managers will have an opportunity to learn and discuss key practical guidelines for design reuse. Drawn from broad real-life IP development and reuse experience, the guidelines and case study presented will allow IP developers and users to benchmark their own design and reuse practices and take important initial steps toward creating fully reusable IP. Lessons from software reuse, organizing for reuse, the design process, re-designing for reuse and IP integration will also be discussed.
