Message from 3PGCIC-2010 Workshops Co-Chairs

Welcome to the 5th International Conference on P2P, Parallel, Grid, Cloud and Internet Computing (3PGCIC-2010), at Fukuoka Institute of Technology, Japan, from November 4-6, 2010.

We are pleased to announce that in response to our Call for Workshop Proposals about 15 workshop proposals were received. The objective of the workshops was to present research results, work on progress and thus complement as much as possible the main themes of 3PGCIC-2010 with specific topics of Grid, P2P, Cloud and Internet Computing. As a result, 7 workshops were organized in conjunction with 3PGCIC-2010 Conference covering research on Simulation and Modelling of Emergent Computational Systems, Data Technologies, Multimedia, Web and Virtual Reality Technologies, Streaming Media Delivery, Middleware of Large Scale Distributed Systems, Business Intelligence and Distributed Systems and Security. The workshops are as following:

1. Third International Workshop on Simulation and Modelling of Emergent Computational Systems (SMECS-2010)
2. First International Workshop on Emerging Data Technologies for Collective Intelligence (EDTCI-2010)
4. First International Workshop on Streaming Media Delivery and Management Systems (SMDMS-2010)
5. First International Workshop on the Middleware of Large Scale Distributed Systems (MiDiS 2010)
6. First International Workshop on Business Intelligence and Distributed Systems (BIDS-2010)
7. First International Workshop on Securing Information in Distributed Environments and Ubiquitous Systems (SIDEUS 2010)

We would like to thank all workshop organizers for their hard work in organizing these workshops and selecting high quality papers for presentation at workshops, the interesting programs and for the arrangements of the workshop during the conference days.

We hope you will enjoy the conference and have a great time in Fukuoka.

3PGCIC-2010 Workshops Co-Chairs

Takahiro Hara, Osaka University, Japan
Farookh Hussain, Curtin University of Technology, Australia
