Welcome to 2-nd International Workshop on Multimedia, Web and Virtual Reality Technologies and Applications (MWVRTA-2011). The MWVRTA-2011 is held in conjunction with the 6th International Conference on P2P, Parallel, Grid, Cloud and Internet Computing (3PGCIC-2011), at Catalonia Technical University, Barcelona, Spain from October 26 to October 28, 2011.

With appearance of multimedia, web and virtual reality technologies, different types of networks, paradigms and platforms of distributed computation are emerging as new forms of the computation in the new millennium. Among these paradigms and technologies, Web computing, multimodal communication, and tele-immersion software are most important. From the scientific perspective, one of the main targets behind these technologies and paradigms is to enable the solution of very complex problems such as e-Science problems that arise in different branches of science, engineering and industry. The aim of this workshop is to present innovative research and technologies as well methods and techniques related to new concept, service and application software in Emergent Computational Systems, Multimedia, Web and Virtual Reality. It provides a forum for sharing ideas and research work in all areas of multimedia technologies and applications.

It is impossible to organize such a successful program without the help of many individuals. We would like to express our appreciation to the authors of the submitted papers, and to the program committee members, who provided timely and significant reviews.

We hope all of you will enjoy MWVRTA-2011 and find this a productive opportunity to exchange ideas and research work with many researches.

MWVRTA-2011 International Workshop Co-chairs
Yoshitaka Shibata, Iwate Prefectural University, Japan
Leonard Barolli, Fukuoka Institute of Technology, Japan

MWVRTA-2011 International Workshop PC Chair
Kaoru Sugita, Fukuoka Institute of Technology, Japan
