Message from the General Chairs
ACOMP 2015

The International Conference on Advanced COMPuting and Applications (ACOMP) is an annual, multi-track international forum for academics, engineers, practitioners and research students to exchange their ideas, techniques, methods, and state-of-the-art applications for advanced computing. Initially formed as a scientific venue for high-performance computing & advanced applications, the conference kept expanding and had a pedigree of attracting international and Vietnamese participants who both are interested in advanced topics of computer science & engineering. The first occurrence of ACOMP was dated back to as early as 2007. Ever since, the ACOMP conference series had successfully been held annually, primarily in the beautiful campus of the HCMC University of Technology. For the year of 2015, ACOMP solicits high-quality papers in the following disciplines: information systems, software engineering, high performance computing, embedded systems, image processing and the like. The ACOMP 2015 conference features invited keynotes about business processes, model-based reasoning in software engineering, scale computing, networking solutions, etc. given by high-profile, world-class academics from Italy, Spain, Germany, Japan and New Zealand.

The ACOMP 2015 conference takes place in the main campus of the HCMC University of Technology. Located near the heart of Ho Chi Minh City, the hosting university serves as the leading research and education hub for sciences & engineering in the southern area of Vietnam. Ho Chi Minh City is the largest, most populous and fast-growing city in Vietnam.

Thoai Nam, HCMC University of Technology, Vietnam
Roland Wagner, Johannes Kepler University Linz, Austria
