Welcome to the 2nd International Workshop on Web and Mobile Information Systems (WAMIS 2006). The theme of the workshop was to provide a forum for researchers from different disciplines in order to explore new ideas and to develop new approaches. WAMIS 2006 attracted a large number of submissions covering a range of related topics including web and database technologies, multi-agents systems, mobile systems, service oriented computing, networking and applications, grid computing, and ubiquitous services.

We are pleased to have altogether sixteen papers accepted for presentations authored by researchers from all over the world. All submitted papers to this workshop went through a rigorous peer-reviewing and paper selection processes. Authors of presented papers will be invited to submit extended version of their papers for publication in a special issue of the Journal of Computer and System Sciences.

We would like to express our gratitude to all the program committee members for their support in the selection of quality research papers thus enabling a good technical program. With their reviews and professional comments in a timely manner made this workshop a success. Special thanks go to the AINA 2006 organizers for their constant help throughout all the stages of the workshop. We are also thankful to the local organizers for the local arrangements.

Workshop Organizers

Dr. Elhadi Shakshuki
Acadia University, Canada

Dr. Muhammad Younas
Oxford Brookes University, UK

Dr. Kuo-Ming Chao
