Recent advances in networking and computing technologies greatly influence information processing in various domains such as commerce, education, healthcare, and entertainment. The aim of the 2006 International Symposium on Frontiers in Networking with Applications (FINA 2006) was to provide a forum for researchers involved in the design and development of networking, web technologies, database systems, grid computing, multi-agent systems, mobile networks and sensor networking.

FINA 2006 was held in conjunction with the IEEE 20th International Conference on Advanced Information Networking and Applications (AINA 2006), Vienna University of Technology, Vienna, Austria, April 18-20, 2006.

FINA 2006 contains quality of research papers submitted by authors from all over the world. We would like to thank all the authors for their contribution to FINA 2006. We also thank the FINA 2006 and the AINA 2006 organizing committees for the selection of such quality papers and for making an excellent technical programme. Thanks also go to all the participants for attending FINA 2006 and for enabling interesting technical discussions. We are also grateful of the local organising committee for local arrangements.

Symposium Co-Chairs

Muhammad Younas, Oxford Brookes University, UK
Hui-Huang Hsu, Tamkang University, Taiwan
