# Table of Contents

## ANCS 2013 Organization

Session 1: Packet Processing
- **GAMT: A Fast and Scalable IP Lookup Engine for GPU-Based Software Routers** ......................................................................................................................... 1
  Yanbiao Li, Dafang Zhang (Hunan University), Alex X. Liu (Michigan State University), Jintao Zheng (Hunan University)
- **Design Principles for Packet Parsers** .......................................................................................................... 13
  Glen Gibb (Stanford University), George Varghese (Microsoft Research), Mark Horowitz, Nick McKeown (Stanford University)
- **Fast and Flexible: Parallel Packet Processing with GPUs and Click** ..................................................... 25
  Weibin Sun, Robert Ricci (University of Utah)

Session 2: Data Center Networking
- **The Scope for Online Social Network Aided Caching in Web CDNs** .................................................... 37
  Amit Ruhela (IIT Delhi & C-DOT Delhi), Sipat Triukose, Sebastien Ardon (NICTA), Amitabha Bagchi (IIT Delhi), Anirban Mahanti (NICTA), Aaditeshwar Seth (IIT Delhi)
- **Speeding Up Packet I/O in Virtual Machines** ........................................................................................... 47
  Luigi Rizzo, Giuseppe Lettieri, Vincenzo Maffione (Università di Pisa)
- **Dahu: Commodity Switches for Direct Connect Data Center Networks** .............................................. 59
  Sivasankar Radhakrishnan, Malveeka Tewari, Rishi Kapoor, George Porter (University of California, San Diego), Amin Vahdat (Google Inc. and University of California, San Diego)

Session 3: TCAMs
- **Scalable Ternary Content Addressable Memory Implementation Using FPGAs** ................................ 71
  Weirong Jiang (Xilinx Research Labs)
- **Scalable TCAM-based Regular Expression Matching with Compressed Finite Automata** ............. 83
  Kun Huang (Chinese Academy of Sciences), Linxuan Ding (Hunan University), Gaogang Xie (Chinese Academy of Sciences), Dafang Zhang (Hunan University), Alex X. Liu (Michigan State University), Kave Salamatian (Universite de Savoie)
- **A Ternary Unification Framework for Optimizing TCAM-based Packet Classification Systems** ................................................................................................................................. 95
  Eric Norige, Alex X. Liu, Eric Torng (Michigan State University)

Poster Session
- **Re-Design of Path Synchronization for Minimal Latency Data Vortex Optical Interconnection Network** .................................................................................................................. 105
  Qimin Yang (Harvey Mudd College)
- **Balancing Authentication and Location Privacy in Cooperative Authentication** ............................. 107
  Liu Licai (Beijing University of Posts and Telecommunications and Chinese Academy of Sciences), Guo Yunchuan, Yin Lihua (Chinese Academy of Sciences), Sun Yan (Beijing University of Posts and Telecommunications and Chinese Academy of Sciences)
- **PPI: Towards Precise Page Identification for Encrypted Web-Browsing Traffic** ............................. 109
  Zhenlong Yuan, Yibo Xue (Tsinghua University), Wei Xia (North China Electric Power University)
- **Cyclostationary Codec: A Framework to Enable Alternative Network Architectures** ..................... 111
  Justin Tallon, Tim K. Forde, Linda E. Doyle (CTVR Trinity College)
• k-p0f: A High-Throughput Kernel Passive OS Fingerprinter .......................................................... 113
  Jason Barnes, Patrick Crowley (Washington University in St. Louis)

• Thermal Prediction and Scheduling of Network Applications on Multicore Processors .......... 115
  Chih-Hsun Chou, Mehmet E. Belvireali, Laxmi N. Bhuyan (University of California, Riverside)

• Optimizing a Network Layer Moving Target Defense for Specific System Architectures .... 117
  Owen Hardman, Stephen Groat, Randy Marchany, Joseph Tront (Virginia Tech)

• Design of Credentials for High-Speed Access Control in Service-Oriented Networks .......... 119
  Hao Cai, Tilman Wolf (University of Massachusetts)

• Performance Measurement of the CCNx Synchronization Protocol .................................... 121
  Hila Ben Abraham, Patrick Crowley (Washington University in St. Louis)

• Architecture for an Open Source Network Tester .............................................................. 123
  Muhammad Shahbaz (Georgia Institute of Technology), Gianni Antichi (University of Cambridge),
  Yilong Geng (Stanford University), Noa Zilberman (University of Cambridge),
  Adam Covington (Stanford University), Marc Bruyere (Université de Toulouse),
  Nick Feamster (Georgia Institute of Technology), Nick McKeown (Stanford University), Bob Felderman (Google),
  Michaela Blott (Xilinx), Andrew W. Moore (University of Cambridge), Philippe Owezarski (Université de Toulouse)

Session 5: Network Security

• High-Performance Architecture for Dynamically Updatable Packet Classification on FPGA ...... 125
  Yun R. Qu, Shijie Zhou, Viktor K. Prasanna (University of Southern California)

• Scalable High-Performance Parallel Design for Network Intrusion Detection Systems
  on Many-Core Processors ................................................................................................................ 137
  Haiyang Jiang, Guangxing Zhang, Gaogang Xie (Chinese Academy of Sciences),
  Kavé Salamatian (University of Savoie, France), Laurent Mathy (University of Liège, Belgium)

• Automated Signature Extraction for High Volume Attacks ........................................ 147
  Yehuda Afek (Tel-Aviv University), Anat Bremler-Barr (Interdisciplinary Center Herzliya),
  Shir Landau Feibish (Tel-Aviv University)

Session 6: Potpourri

• Asymmetric Scaling on Network Packet Processors in the Dark Silicon Era ......................... 157
  Sourav Roy, Xiaomin Lu, Edmund Gieske, Peng Yang (Freescale Semiconductor Inc.),
  Jim Holt (Freescale Semiconductor Inc; MIT Computer Science and Artificial Intelligence Laboratory)

• Optimal Networks from Error Correcting Codes ............................................................ 169
  Ratko V. Tomic (Infinetics Technologies, Inc.)

• FAR: A Fault-Avoidance Routing Method for Data Center Networks with Regular Topology ...... 181
  Yantao Sun (Beijing Jiaotong University), Min Chen (Huazhong University of Science and Technology),
  Bin Liu (ZTE Inc.), Shiwen Mao (Auburn University)

Session 7: Packet Classification

• SWSL: Software Synthesis for Network Lookup ........................................................................... 191
  Sung Jin Kim, Lorenzo De Carli, Karthikeyan Sankaralingam (University of Wisconsin-Madison),
  Cristian Estan (Broadcom Corporation)

• Picking Pesky Parameters: Optimizing Regular Expression Matching in Practice ....... 203
  Xinming Chen (University of Massachusetts, Amherst), Brandon Jones, Michela Becchi (University of Missouri),
  Tilman Wolf (University of Massachusetts, Amherst)

• Named Data Networking on a Router: Fast and DoS-resistant Forwarding
  with Hash Tables ....................................................................................................................... 215
  Won So, Ashok Narayanan, David Oran (Cisco Systems)

Author Index ........................................................................................................................................... 226
