Preface
AP2PS 2009

The First International Conference on Advances in Peer-to-Peer Systems (AP2PS 2009), held from October 11 to October 16, 2009 in Sliema, Malta, was built on the success of the First International Workshop on Computational P2P Networks (ComP2P 2008) but had a broader focus. AP2PS 2009 aimed at capturing the latest developments, findings and proposals in the general area of P2P computing, networking, services, and applications. The areas of interest included topics such as advances in theoretical foundations of P2P, performance analysis of P2P frameworks and applications, security, trust and reputation in P2P, time-constrained P2P systems, and quality of experience in P2P systems.

Peer-to-peer systems have considerably evolved since their original conception, in the 90’s. The idea of distributing files using the user’s terminal as a relay has now been widely extended to embrace virtually any form of resource (e.g., computational and storage resources), data (e.g. files and real-time streams) and service (e.g., IP telephony, IP TV, collaboration). More complex systems, however, require more sophisticated management solutions, and in this context P2P can become an interesting issue, playing the hole of both the target and the enabler of new management systems.

We take here the opportunity to warmly thank all the members of the AP2PS 2009 technical program committee as well as the numerous reviewers. The creation of such a broad and high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and efforts to contribute to the AP2PS 2009. We truly believe that thanks to all these efforts, the final conference program consists of top quality contributions.

This event could also not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the AP2PS 2009 organizing committee for their help in handling the logistics and for their work that is making this professional meeting a success. We gratefully appreciate to the technical program committee co-chairs that contributed to identify the appropriate groups to submit contributions.

We hope the AP2PS 2009 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in peer-to-peer systems.

We hope Malta provided a pleasant environment during the conference and everyone saved some time for exploring this historic island.

AP2PS 2009 Editors
Marco Aiello, University of Groningen, The Netherlands
Filip De Turck, Ghent University - IBBT, Belgium
Petre Dini, Cisco Systems, Inc., USA / Concordia University, Canada
Giancarlo Fortino, University of Calabria, Italy
Stephen Jarvis, University of Warwick, UK
Maozhen Li, Brunel University, UK
Carl James Debono, University of Malta & IEEE Malta
Nick Antonopoulos, University of Surrey, UK
Antonio Liotta, Eindhoven University of Technology, The Netherlands
Lisandro Zambenedetti Granville, Federal University of Rio Grande do Sul, Brazil
George Exarchakos, University of Surrey, UK
Takahiro Hara, Osaka University, Japan
(Mehmet) Rasit Eskicioglu, University of Manitoba, Canada
Anders Fongen, Norwegian Defence Research Establishment, Norway
Yasushi Kambayashi, Nippon Institute of Technology, Japan
