14th Asia Pacific Software Engineering Conference

**Message from the Conference Chairs** ................................................................. xii
**Message from the Program Chair** ................................................................. xiii
**Conference Committee** ................................................................................ xiv
**Steering Committee** ..................................................................................... xv
**Program Committee** .................................................................................... xvi
**External Reviewers** ....................................................................................... xviii

## Keynote Speech

Specialising in Software Engineering ................................................................. 3  
*Prof. Michael Jackson*

## Tutorials

Evaluating Product Line Architectures: Methods and Techniques ..................... 13  
*Prof. Muhammad Ali Babar*

The Problem Frames Approach to Software Engineering ...................................... 14  
*Prof. Michael Jackson*

## Technical Papers

### Session 1A: Requirements Engineering I

Aligning the Map Requirements Modelling with the B-method for Formal Software Development ................................................................. 17  
*Abdul Babar, Vladimir Tosic, and John Potter*

A Methodological Framework for SysML: A Problem Frames-Based Approach ........ 25  
*Pietro Colombo, Vieri Del Bianco, Luigi Lavazza, and Alberto Coen-Porisini*
Session 1B: Testing and Analysis I

Using Genetic Algorithms to Aid Test-Data Generation for Data-Flow Coverage
Ahmed S. Ghiduk, Mary Jean Harrold, and Moheb R. Girgis
Finding a Test Order Using Object-Oriented Slicing Technique
Jutarat Jaroenpiboonkit and Taratip Suwannasart
Function Call Flow Based Fitness Function Design in Evolutionary Testing
Xiyang Liu, Miao Zhang, Zhiwen Bai, Lei Wang, Wen Du, and Yan Wang

Session 1C: Service-Oriented and Web-Based Software

Secure Behavior of Web Browsers to Prevent Information Leakages
Takaaki Tateishi and Naoshi Tabuchi
Realizability of Collaboration-Based Service Specifications
Humberto Nicolas Castejon, Rolv Brak, and Gregor von Bochmann
The Validation and Verification of WSCDL
Geguang Pu, Jianqi Shi, Zheng Wang, Lu Jin, Jing Liu, and Jifeng He

Session 2A: Requirements Engineering II

Figure Out the Current Software Requirements Engineering—What Practitioners Expect to Requirements Engineering?
Mayumi Itakura Kamata, Ai Yoshimoto Yoshida, Hisashi Yoshida, and Nao Aoki
A Method for Early Requirements Triage and Selection Utilizing Product Strategies
Mahvish Khurum, Khurum Aslam, and Tony Gorschek
Pseudo Software: a New Concept for Iterative Requirement Development and Validation
Jung-Sing Jwo and Yu Chin Cheng
Enterprise Assets Security Requirements Construction from ESRMG Grammar
Based on Security Patterns
Kawin Supaporn, Nakornthip Prompoon, and Thongchai Rojkangsadan

Session 2B: Testing and Analysis II

Construction Method of a High-Order Markov Chain Usage Model
Tomohiko Takagi and Zengo Furukawa
Static Call Graph Generator for C++ Using Debugging Information
Yui Terashima and Katsuhiko Gondow
Improving Data Integrity with a Java Mutability Analysis
Aiwu Shi and Gleb Naumovich
Field Escape Analysis for Data Confidentiality in Java Components
Aiwu Shi and Gleb Naumovich
Session 2C: Software Components and Reuse

Coordination-Policy Based Composed System Behavior Derivation ................................. 151
Yiming Lau, Wenyun Zhao, Xin Peng, Zhixiong Jiang, and Liwei Shen

Approximation Algorithms for Software Component Selection Problem ....................... 159
Nima Haghpahnah, Shahrouz Moaven, Mehdi Kargar, Jafar Habibi, and Soheil Hassas Yeganeh

Towards Instant Automatic Model Refinement Based on OCL ........................................ 167
Hui Song, Yanchun Sun, Li Zhou, and Gang Huang

Modeling and Learning Interaction-Based Accidents for Safety-Critical Software Systems ... 175
Tariq Mahmood, Edmund Kazmierczak, Tim Kelly, and Dennis Plunkett

Session 3A: Aspect-Oriented Software

Conformance Checking of Running Programs in Dynamic Aspect-Oriented Systems .................. 183
Chien-Min Wang, Chi-Chang Huang, Hsi-Min Chen, and Shun-Te Wang

Toward Efficient Aspect Mining for Linux .............................................................. 191
Danfeng Zhang, Yao Guo, Yue Wang, and Xiangqun Chen

Using B to Verify the Weaving of Aspects ...................................................................... 199
Truong Ninh Thuan and Nguyen Viet Ha

E-AoSAS++ and its Software Development Environment ............................................... 206
Masami Noro, Atsushi Sawada, Yoshinari Hachisu, and Masahide Banno

Session 3B: Software Metrics and Measurement

Visualization for Software Evolution Based on Logical Coupling and Module Coupling .......... 214
Noriko Hanakawa

Optimising Project Feature Weights for Analogy-Based Software Cost Estimation .............. 222
Jacky W. Keung and Barbara Kitchenham

An Empirical Study of Class Sizes for Large Java Systems ........................................... 230
Hongyu Zhang and Hee Beng Kuan Tan

Are Size Measures Better Than Expert Judgement? An Industrial Case Study on Requirements Volatility ......................................................................................... 238
Annabella Loconsole and Jurgen Borstler

Session 3C: Software Maintenance and Evolution

A Middleware-Based Approach to Model Refactoring at Runtime .................................... 246
Ling Lan, Gang Huang, Weihu Wang, and Hong Mei

Applying a Code Clone Detection Method to Domain Analysis of Device Drivers .......... 254
Yu-Seung Ma and Duk-Kuyn Woo

Simultaneous Modification Support Based on Code Clone Analysis .................................. 262
Yoshiki Higo, Yasushi Ueda, Shinji Kusumoto, and Katsuro Inoue

Incentive Compatible Mechanisms for Group Ticket Allocation in Software Maintenance Services ........................................................................................................ 270
Karthik Subbian, Ramakrishnan Kannan, Raghav K. Gautam, and Y. Narahari
**Session 4A: Formal Methods I**

Statechart-Based Verification of Object-Oriented Design Models

*Toshiaki Aoki and Takuya Katayama*

Compositional Verification of UML Dynamic Models

*Wei Dong, Ji Wang, Zhichang Qi, and Ni Rong*

Requirements Engineering for Reactive Systems: Coloured Petri Nets for an Elevator Controller

*João M. Fernandes, Jens Bak Jorgensen, and Simon Tjell*

**Session 4B: Software Architecture and Design**

An Executable UML with OCL-Based Action Semantics Language

*Ke Jiang, Lei Zhang, and Shigeru Miyake*

Injecting Security as Aspectable NFR into Software Architecture

*Hamid Bagheri and Seyed Hassan Mirian Hosseinabadi*

An Investigation into Concurrency Control Mechanisms in Data Service Layers

*Krishneel Goundar, Santokh Singh, and Xin Feng Ye*

**Session 4C: Embedded Systems**

Enhancing the ESIM (Embedded Systems Improving Method) by Combining Information Flow Diagram with Analysis Matrix for Efficient Analysis of Unexpected Obstacles in Embedded Software

*Yasufumi Shinyashiki, Toshiro Mise, Masaaki Hashimoto, Keiichi Katamine, Naoyasu Ubayashi, and Takako Nakatani*

Developing an Insulin Pump System Using the SOFL Method

*Jichuan Wang, Shaoying Liu, Yong Qi, and Di Hou*

Aspect-Oriented Modeling for Embedded Software Design

*Natsuko Noda and Tomoji Kishi*

**Session 5A: Formal Methods II**

Automatic Extraction and Verification of Page Transitions in a Web Application

*Atsuto Kubo, Hironori Washizaki, and Yoshiaki Fukazawa*

Disk Based Software Verification via Bounded Model Checking

*Fernando Brizolari, Igor Melatti, Enrico Tronci, and Giuseppe Della Penna*

A Synchronization Flow Analysis of Concurrent Objects in AIBO OPEN-R Programs Based on Communicating Processes

*Ryo Suetsugu, Shoji Yuen, and Kiyoshi Agusa*
Session 5B: Software Processes I

A Process Pattern Language for Agile Methods 374
Xiang-xi Meng, Ya-sha Wang, Lei Shi, and Feng-jian Wang

Deriving Software Process Simulation Model from SPEM-based Software Process Model 382
SeungHun Park, KeungSik Choi, KyungA Yoon, and Doo-Hwan Bae

Definition of an Executable SPEM 2.0 390
Reda Bendraou, Benoit Combemale, Xavier Cregut, and Marie-Pierre Gervais

Session 5C: Empirical Software Engineering

Experiment-Driven Approach to Building Support for Distributed Agile Teams 398
Jacek Dajda and Grzegorz Dobrowolski

An Approach to Probabilistic Effort Estimation for Military Avionics Software Maintenance by Considering Structural Characteristics 406
Tae-Hoon Song, Kyung-A Yoon, and Doo-Hwan Bae

A Large-Scale Empirical Comparison of Object-Oriented Cohesion Metrics 414
Richard Barker and Ewan Tempero

Session 6A: Secure Software

An Approach for Specifying Access Control Policy in J2EE Applications 422
Hieu Vo and Masato Suzuki

Early Validation and Verification of a Distributed Role-Based Access Control Model 430
Saad Zafar, Robert Colvin, Kirsten Winter, Nisansala Yatapanage, and R.G. Dromey

Reducing Unnecessary Conservativeness in Access Rights Analysis with String Analysis 438
Mika Koganeyama, Naoshi Tabuchi, and Takaaki Tateishi

Session 6B: Software Processes II

A Six Sigma Framework for Software Process Improvements and its Implementation 446
Zhedan Pan, Hyunchel Park, Jongmoon Baik, and Hojin Choi

Methodology Support for the Model Driven Architecture 454
Fatemeh Chitforoush, Maryam Yazdandoost, and Raman Ramsin

Use of Agile Methods and Practices in the Philippines 462
Raymund Sison and Theresa Yang

A Survey on the Business Relationship between Chinese Outsourcing Software Suppliers and their Outsourcers 470
Jingyue Li, Jianqiang Ma, Reidar Conradi, Weibing Chen, Junzhong Ji, and Chunnian Liu
Session 7A: Software Product-Line

Identifying Key Requirements for a New Product Line
Juha Savolainen, Marjo Kauppinen, and Tomi Mannisto

Tailoring the Domain Engineering Process of the PLUS Method
Tsuneo Nakanishi, Mitsunori Fujita, Susumu Yamazaki, Naohito Yamashita, and Shuichi Ashihara

Deriving Product Line Requirements: The RED-PL Guidance Approach
Olfa Djebbi, Camille Salinesi, and Daniel Diaz

Session 7B: Tools and Development Environments

ezContract: Using Marker Library and Bytecode Instrumentation to Support Design by Contract in Java
Yu Chin Cheng, Chien-Tsun Chen, and Chin-Yun Hsieh

MKtrace: An Innovative Debugging Tool for Multi-Threaded Programs on Multiprocessor Systems
Yusen Li, Feng Wang, Gang Wang, Xiaoguang Liu, and Jing Liu

Checking Distributed Programs with Partially Ordered Atoms
H.F. Li and Eslam Al-Maghayreh

Session 7C: Software Quality Management

Quantitative Analysis of Value-Based Software Processes Using Decision-Based Stochastic Object Petri-Nets
Reng Yin, Hao Hu, Jidong Ge, and Jian Lu

Improving Effort Estimation Accuracy by Weighted Grey Relational Analysis During Software Development
Chao-Jung Hsu and Chin-Yu Huang

A Novel Approach of Prioritizing Use Case Scenarios
Debasish Kundu and Debasis Samanta

Workshops

W1: Workshop on Accountability and Traceability in Global Software Engineering (ATGSE2007)
Katsuro Inoue and Mike Barker

W2: First International Workshop on Management and Economics of Software Product Lines (MESPUL)
Muhammad Ali Babar and Makoto Nonaka

W3: 1st International Workshop on Software Patterns and Quality (SPAQu’07)
Hironori Washizaki and Nobukazu Yoshioka

W4: Workshop on Service Oriented Architecture
Toshiro Takase

W5: Education Workshop: Bridging the University/Industry Gap
J. Barrie Thompson, Masami Noro, and Helen M. Edwards

W6: The First International Workshop on Software Productivity Analysis and Cost Estimation (SPACE’07)
Jacky Keung
Research Posters

Robust and Flexible Software Inspection model* for Software Re-Engineering Process:
Abstraction phase _________________________________________________________________565
Fida Hussain and Muhammad Saeed Shehzad
Architectural Naming, A Secret of Agile Thinking________________________________________565
Zahra Karimi Dehkordi and Elahe Najafi
Time-Quality Metric Model for Quality Measurement of Web-Based Systems ___________________566
Basem Suleiman, Eldar Aliev, and Vladimir Tosic
Analyzing the Service Level of Software Debugging System through Simulation-Based
Queuing Approach ______________________________________________________________________566
Chu-Ti Lin and Chin-Yu Huang
Distributed Collaborative Modeling Support System for UML Diagrams__________________________567
Dongmei Xu, Jun Kurogi, Yoshihide Ohgame, and Atsuo Hazeyama
The TASM Language and the Hi-Five Framework: Specification, Validation, and Verification
of Embedded Real-Time Systems ________________________________________________________567
Martin Ouimet and Kristina Lundqvist
UCSI: Towards a User-Centric Service Integration Approach ________________________________568
Pengwei Tian, Yaoxue Zhang, Yuezhi Zhou, Ming Zhong, and Cunhao Fang
Formal Model-Driven Engineering of Distributed Simulation Systems
Based on Architecture-Centric Domain-Specific Approach ____________________________________568
Di Wu, Jie Chen, and Flavio Oquendo
DFTL: A Description Language for Transformation of Data Formats___________________________569
Meng Wang, Ping Chen, Xiyang Liu, Shengming Hu, and Miao Zhang
Email and Trouble Report Analysis for Revealing Context with the Project Replayer _____________569
Kimiharu Ohkura, Shinji Kawaguchi, Noriko Hanakawa, and Hajimu Iida
PORD: A Reversible Debugging Tool Using Dynamic Binary Translation ______________________570
Xiyang Liu, Tao Liu, Zhiwen Bai, Yan Wang, Haoying Mu, and Chunxiang Li
Non-Functional Requirements Elicitation and Incorporation into Functional Models _____________570
Xiaoyu Song
Validating Software Reliability by Binary Translation _________________________________________570
Yi Wang
Project Management Practices on Building Management Information System
in IBM Global Business Service __________________________________________________________571
Yi Wang and Huihui Shi
MEtaGile: An Agile Domain-Specific Modeling Environment _______________________________571
Olivier Buchwalder
Analysis of the Factors of Influencing Parent’s Confidence on the Internet
by Associating Rules Mining ____________________________________________________________572
Sheng-Fei Hsu and Hui-Ling Yu
