Computer Vision 1

A Novel Illumination-Invariant Loss for Monocular 3D Pose Estimation ........................................37
Srimal Jayawardena, Marcus Hutter, and Nathan Brewer

Robust Image Registration via Cepstral Analysis .................................................................45
Ruben Gonzalez

3D Model Assisted Image Segmentation .................................................................51
Srimal Jayawardena, Di Yang, and Marcus Hutter

Specularity Removal from Imaging Spectroscopy Data via Entropy Minimisation ..........59
Lin Gu and Antonio Robles-Kelly

Analysis on Tree Structure Selection for MRF Inference in Low-level Vision ..................66
Jun Sun, Hongdong Li, and Xuming He

Fast Kernel Sparse Representation ...............................................................................72
Hanxi Li, Yongsheng Gao, and Jun Sun

Computer Vision 2

Phase Based Disparity Estimation Using Adaptive Structured Light and Dual-Tree Complex Wavelet ........................................78
Qiang Li, Moyuresh Biswas, Michael R. Frater, and Mark R. Pickering

Superpixels, Occlusion and Stereo ...............................................................................84
Yuhang Zhang, Richard Hartley, John Mashford, and Stewart Burn

Optical-Flow Perspective Invariant Registration .........................................................92
Adrian Clark and Richard Green

Simultaneous Multi-class Pixel Labeling over Coherent Image Sets ...........................99
Paul Rivera and Stephen Gould

Activity Modelling in Crowded Environments: A Soft-Decision Approach ..................107
Jingxin Xu, Simon Denman, Sridha Sridharan, and Clinton Fookes

Line Drawing Interpretation Using Belief Propagation ..............................................113
Yansheng Ming, Hongdong Li, and Jun Sun

Pattern Recognition

Comparing Visual Data Fusion Techniques Using FIR and Visible Light Sensors to Improve Pedestrian Detection ..............................................119
Jan Thomanek, Marc Ritter, Holger Lietz, and Gerd Wanielik

Scene Classification Using Candidate Classes Selection with Particle Filter and Criterion Mining for Final Decision with AdaBoost .........................126
Kazuhiro Hotta
Visual Voice Activity Detection Using Frontal versus Profile Views .........................................................134
   Rajitha Navarathna, David Dean, Sridha Sridharan, Clinton Fookes, and Patrick Lucey

Evaluating Automatic Road Detection across a Large Aerial Imagery Collection .................................................................140
   Xufeng Guo, David Dean, Simon Denman, Clinton Fookes, and Sridha Sridharan

An Efficient Face Recognition System Using DWT-ICA Features ..........................................................................................146
   N. T. Naresh Babu, A. Annis Fathima, and V. Vaidehi

3D Model-Based Sematic Labeling of 2D Objects ................................................................................................152
   Raluca-Diana Petre and Titus Zaharia

**Image Coding and Processing 1**

Model-Based Video Coding Using Colour and Depth Cameras ............................................................................................158
   David Sandberg, Per-Erik Forssén, and Jens Ogniewski

Real-Time Photo Sensor Dead Pixel Detection for Embedded Devices ..................................................................................164
   Chao-Yi Cho, Tse-Min Chen, Wen-Shan Wang, and Chun-Nan Liu

Efficient Video Coding Considering a Video as a 3D Data Cube ..........................................................................................170
   Manoranjan Paul and Weisi Lin

A Novel Image Compressive Sensing Method Based on Complex Measurements ................................................................175
   Nandini Ramesh Kumar, Wei Xiang, and Jeffrey Soar

Parallel Algorithms via Scaled Paraboloid Structuring Functions for Spatially-Variant and Label-Set Dilations and Erosions ..................................................................................180
   Richard Beare and Paul Jackway

A Contour-Based Approach to Image Compression ........................................................................................................186
   Gabriel Scarmana

**Statistical and Structural Pattern Recognition**

Natural Image Character Recognition Using Oriented Basic Image Features .................................................................191
   Andrew J. Newell and Lewis D. Griffin

Improved Symmetric-SIFT for Multi-modal Image Registration ..........................................................................................197
   Md. Tanvir Hossain, Guohua Lv, Shyh Wei Teng, Guojun Lu, and Martin Lackmann

On the Optimality of Sequential Forward Feature Selection Using Class Separability Measure ..................................................203
   Lei Wang, Chunhua Shen, and Richard Hartley

Laplacian Margin Distribution Boosting for Learning from Sparsely Labeled Data ..................................................................209
   Tao Wang, Xuming He, Chunhua Shen, and Nick Barnes
An Exploration of Feature Detector Performance in the Thermal-Infrared Modality

Stephen Vidas, Ruan Lakemond, Simon Denman, Clinton Fookes, Sridha Sridharan, and Tim Wark

Prioritized 3-D Video Transmission over Cooperative MIMO-OFDM Systems

Omar Hazim Salim and Wei Xiang

**Surveillance, Defence and Industrial Applications 1**

PIL-EYE: Integrated System for Sustainable Development of Intelligent Visual Surveillance Algorithms

Hyung Jin Chang, Kwang Moo Yi, Shimin Yin, Soo Wan Kim, Young Min Baek, Ho Seok Ahn, and Jin Young Choi

Scene Invariant Crowd Counting

David Ryan, Simon Denman, Sridha Sridharan, and Clinton Fookes

Visual Maritime Attention Using Multiple Low-Level Features and Naïve Bayes Classification

Thomas Albrecht, Geoff A.W. West, Tele Tan, and Thanh Ly

Analysis of Brightness Transfer Function for Matching Targets across Networked Cameras

Pankaj Kumar and Kutluyil Doğançay

Contextual Action Recognition in Multi-sensor Nighttime Video Sequences

Anwaar-ul-Haq, Iqbal Gondal, and Manzur Murshed

Probabilistic Approach with Three Hierarchies of Motion Estimation for Video Stabilization

Kimin Yun, Soo Wan Kim, and Jin Young Choi

**Biomedical and e-Health Applications 2**

Colour Texture Analysis for Classifying the Tear Film Lipid Layer: A Comparative Study

B. Remeseiro, L. Ramos, M. Penas, E. Martínez, M.G. Penedo, and A. Mosquera

Variational Bayes Inference Based Segmentation of Heterogeneous Lymphoma Volumes in Dual-Modality PET-CT Images

Jiyong Wang, Yong Xia, Jiabin Wang, and David Dagan Feng

Precision Assessment of B-Mode Ultrasound for Non-Invasive Motion Analysis of Knee Joints

A Comparison Study of Ellipsoid Fitting for Pose Normalization of Hippocampal Shapes

Luping Zhou and Olivier Salvado
Automatic Analysis of the Patient’s Conscious Responses to the Emission of Auditory Stimuli during the Performance of an Audiometry .................................................................291
   A. Fernandez, M.G. Penedo, M. Ortega, B. Cancela, C. Vazquez, and L.M. Gigirey

Lossless Compression of Segmented CT Medical Images According to the Hounsfield Scale .................................................................................................................................297
   Denis Špelič, Domen Mongus, and Borut Žalik

A Rapid Procedure for Spectral Similarity Matching of Heteronuclear Single Quantum Coherence Spectra .......................................................................................................................302
   Zhengyi Yang, Viktor Vegh, David C. Reutens, and Gregory K. Pierens

Qualitative and Quantitative Analysis of Six Image Fusion Methodologies and Their Application to Medical Imaging .................................................................308
   Seyyed Adel Alavi Fazel, Yaniv Gal, Zhengyi Yang, and Viktor Vegh

A Study on Static Image Derived Input Function for Non-invasively Constructing Parametric Image in Functional Imaging .................................................................314
   Xian Shi, Lingfeng Wen, Weidong Cai, and David Dagan Feng

An Evaluation of Multi-resolution Microscope Slide Scanning Algorithms .................................................................................................................................319
   Doreen Altinay and Andrew P. Bradley

Automatic Brain Tumour Segmentation in 18F-FDOPA PET Using PET/MRI Fusion .................................................................................................................................325
   Amir Fazlollahi, Nicholas Dowson, Fabrice Meriaudeau, Stephan Rose, Michael Fay, Paul Thomas, Zeike Taylor, Yaniv Gal, Alan Coultard, Craig Winter, David MacFarlane, Olivier Salvado, Stuard Crozier, and Pierrick Bourgeat

Differential Evolution Based Variational Bayes Inference for Brain PET-CT Image Segmentation .................................................................................................................................330
   Jiabin Wang, Yong Xia, and David Dagan Feng

Segmentation of Acne Vulgaris Lesions .................................................................................................................................335
   Roshaslinie Ramli, Aamir Saeed Malik, Ahmad Fadzil M. Hani, and Felix Boon-Bin Yap

Statistical Shape and Probability Prior Model for Automatic Prostate Segmentation .................................................................................................................................340
   Soumya Ghose, Arnau Oliver, Robert Martí, Xavier Lladó, Jordi Freixenet, Jhimli Mitra, Joan C. Vilanova, Josep Comet, and Fabrice Meriaudeau

Novel Convex Active Contour Model Using Local and Global Information .................................................................................................................................346
   Quang Tung Thieu, Marie Luong, Jean-Marie Rocchisani, Emmanuel Viennet, and Dat Tran

Clustered Nuclei Splitting Using Curvature Information .................................................................................................................................352
   Chao Zhang, Changming Sun, and Tuan D. Pham

Classification of Hand-Written Digits Using Chordiograms .................................................................................................................................358
   Geoff Bull and Junbin Gao
Surveillance, Defence and Industrial Applications 2

Automatic Estimation of Nearshore Wave Height from Video Timestacks ................................................................. 364
  Yaniv Gal, Matthew Browne, and Christopher Lane

Automatic Reconstruction of Building Roofs Using LIDAR and Multispectral Imagery ........................................................ 370
  Mohammad Awrangjeb, Chunsun Zhang, and Clive S. Fraser

Classifying Airborne Particles .............................................................................................................................................. 376
  Kapila K. Pahalawatta and Richard Green

The Implementation of Multimedia Decoder Framework for Android on PAC Duo Plateform ..................................................... 382
  Chun-Shian Tsai and Hsuan-Liang Chen

Video Stream Processing on a High Performance Reconfigurable Architecture .............................................................. 388
  Tao Li and Zhentao Liu

A Spatio-Temporal Knowledge-Discovery Platform for Earth-Science Data ........................................................................ 394
  T.C.W. Landgrebe and R.D. Müller

Fingerprints as Spatial Graphs: Nodes and Edges .................................................................................................................. 400
  K. J. Horadam, S. A. Davis, A. Arakala, and J. Jeffers

Building a Statistical AU Space for Facial Expression Recognition in 3D ............................................................................. 406
  Xi Zhao, Emmanuel Dellandréa, Liming Chen, and Jianhua Zou

Intrinsic Image Based Moving Object Cast Shadow Removal in Image Sequences ............................................................... 410
  Pankaj Kumar

Structural Image Classification with Graph Neural Networks ............................................................................................... 416
  Alyssa Quek, Zhiyong Wang, Jian Zhang, and Dagan Feng

On the Use of the Chi-Squared Distance for the Structured Learning of Graph Embeddings ................................................ 422
  Haifeng Zhao, Antonio Robles-Kelly, and Jun Zhou

Real Time High-Sensitivity Imaging for Home Surveillance System by Using Combined Long/Short Exposure ....................... 429
  Satoshi Sato, Yusuke Okada, and Takeo Azuma

A Real Time Surveillance System Using Wired and Wireless Sensor Networks by Multi-algorithmic Approach ....................... 436
  M. Raja Sekar, V. Vaidehi, P. Balamuralidhar, and M. Girish Chandra

Blob Motion Statistics for Pedestrian Detection .................................................................................................................... 442
  Paulo Vinicius and Koerich Borges

Detection versus False Alarm Characterisation of a Vision-Based Airborne Dim-Target Collision Detection System ................... 448
  John Lai, Jason J. Ford, Luis Mejias, Peter O'Shea, and Rodney Walker
Multi-shape Descriptor Vehicle Classification for Urban Traffic ................................................................. 456
  Zezhi Chen and Tim Ellis
Eigen-Patch Based Background Subtraction .................................................................................................. 462
  Tristrom Cooke
Developing a Digital Image Watermarking Model ............................................................................................. 468
  Hussain Nyeem, Wageeh Boles, and Colin Boyd

Computer Vision 3

Action Recognition Using Spatio-Temporal Distance Classifier Correlation
Filter .................................................................................................................................................................. 474
  Anwaar-ul-Haq, Iqbal Gondal, and Manzur Murshed
Graph Rigidity for Near-Coplanar Structure from Motion ................................................................................. 480
  Jack Valmadre, Ben Upcroft, Sridha Sridharan, and Simon Lucey
Robust Core-Point-ROI Based Fingerprint Identification Using a Sparse Classifier ........................................ 487
  Alexandru Paul Condurache and Alfred Mertins
A Simple and Practical Solution to the Rigid Body Motion Segmentation
Problem Using a RGB-D Camera .................................................................................................................. 494
  Samunda Perera and Nick Barnes
SIFT and SURF Performance Evaluation against Various Image Deformations
on Benchmark Dataset ........................................................................................................................................ 501
  Nabeel Younus Khan, Brendan McCane, and Geoff Wyvill
Ship Detection Using Texture Statistics from Optical Satellite Images .......................................................... 507
  Gaopan Huang, Yanqing Wang, Yushuang Zhang, and Yuan Tian
An Observation about Circular Shortest Paths: Dealing with Additional Constraints Using Branch and Bound .......................................................................................................................... 513
  Pascal Vallotton, David Lovell, and Janet Newman
Stereo Matching Using Sub-segmentation and Robust Higher-Order Graph Cut .................................................................................................................................................................................. 518
  Yiran Xie, Nianjun Liu, Sheng Liu, and Nick Barnes
Practical Improvements to Simultaneous Computation of Multi-view Geometry and Radial Lens Distortion ........................................................................................................................................... 524
  Ruan Lakemond, Clinton Fookes, and Sridha Sridharan
Negative Determinant of Hessian Features ...................................................................................................... 530
  Ruan Lakemond, Clinton Fookes, and Sridha Sridharan
Face Recognition across Pose on Video Using Eigen Light-Fields ..................................................................... 536
  Moh Edi Wibowo and Dian Tjondronegoro
A Multi-resolution Image Alignment Technique Based on Direct Methods for Pose Estimation of Aerial Vehicles .................................................................542

Carol Martínez, Luis Mejias, and Pascual Campoy

Unusual Event Detection in Crowded Scenes Using Bag of LBPs in Spatio-Temporal Patches ..................................................................................549

Jingxin Xu, Simon Denman, Clinton Fookes, and Sridha Sridharan

Automated 3D Segmentation and Analysis of Cotton Plants ........................................555

Anthony Paproki, Jurgen Fripp, Olivier Salvado, Xavier Sirault, Scott Berry, and Robert Furbank

Fast RANSAC Hypothesis Generation for Essential Matrix Estimation .......................561

Tom Botterill, Steven Mills, and Richard Green

Compressive Sensing for Gait Recognition ....................................................................567

Sabesan Sivapalan, Rajib Kumar Rana, Daniel Chen, Sridha Sridharan, Simon Denmon, and Clinton Fookes

On the Recovery of Shape and Reflectance from a Single Multispectral Image ...............572

Sejuti Rahman and Antonio Robles-Kelly

Online Tracking of People through a Camera Network ...................................................579

Jamie Sherrah, Dmitri Kamenetsky, Robert Whatmough, and Nicholas J. Redding

Obstacle Detection Using Dynamic Particle-Based Occupancy Grids .............................585

Radu Gabriel Danescu

Non-Overlapping Multi-camera Detection and Tracking of Vehicles in Tunnel Surveillance ..................................................................................591

Jorge Niño Castañeda, Vedran Jelača, Andrés Frías, Aleksandra Pižurica, Wilfried Philips, Reyes Rios Cabrera, and Tinne Tuytelaars

**Image Coding and Processing 2**

Width Distributions for Shape Description ...................................................................597

Xiaozheng Zhang and Yongsheng Gao

Scale and Rotation Invariant Gabor Features for Texture Retrieval .............................602

Blind Video Tamper Detection Based on Fusion of Source Features ...............................608

Julian Goodwin and Girija Chetty

Image Matting via Local Tangent Space Alignment ......................................................614

Junbin Gao

Evaluation of Texture and Geometry for Dimensional Facial Expression Recognition .................................................................620

Ligang Zhang, Dian Tjondronegoro, and Vinod Chandran
Image Coding and Processing 3

Near Perfect Correlation Functions Based on Zero-Sum Projections .................................................................627

Imants Svalbe

Comparison Study of Two Energy Minimization Based Image Segmentation Methods ..........................................................633

Huimin Yu and Dadong Wang

An Accurate Hand Segmentation Approach Using a Structure Based Shape Localization .................................................................639

Jose M. Saavedra, Violeta Chang, and Benjamin Bustos

Efficient Block Mode Decision and Prediction Mode Selection for Intra Prediction in H.264/AVC High Profile .................................................................645

Taeho Kim, Ung Hwang, and Jechang Jeong

Leaf Image Classification with Shape Context and SIFT Descriptors .................................................................650

Zhiyong Wang, Bin Lu, Zheru Chi, and Dagan Feng

Fast Intra Mode Decision Algorithm Using the Sum of Absolute Transformed Differences .................................................................655

Joohyeok Kim and Jechang Jeong

Generalised Hilbert Transforms for the Estimation of Growth Direction in Coral Cores .................................................................660

Ross Marchant and Paul Jackway

Adaptive Order Spline Interpolation for Edge-Preserving Colour Filter Array Demosaicking .................................................................666

Sharmil Randhawa and Jim S. Jimmy Li

Off-line Signature Identification Using Background and Foreground Information .................................................................672

Srikanta Pal, Alaei Alireza, Umapada Pal, and Michael Blumenstein

Document Capturing Method with a Camera Using Robust Feature Points Detection .................................................................678

Woong Hee Kim, Jongwoon Hwang, and Thomas Sikora

Fast Block Matching Algorithm for Constrained One-Bit Transform-Based Motion Estimation Using Binomial Distribution .................................................................683

Hanjin Park, Changryoul Choi, and Jechang Jeong

Cooperative Relay Selection Based UEP Scheme for 3D Video Transmission over Rayleigh Fading Channel .................................................................689

Ibrahim Khalil Sileh, Khalid Mohamed Alajel, and Wei Xiang

Author Index ............................................................................................................................................694
