Message from the Workshop Chairs

CEWE 2013

It is our great pleasure to welcome you to the 2nd International Workshop on Cybercrimes and Emerging Web Environments (CEWE 2013), which will be held in conjunction with the 4th International Conference on Emerging Intelligent Data and Web Technologies (EIDWT 2013) in Xi’an, China from 9-11 September 2013.

This international workshop is a forum for sharing ideas and research work in cybercrimes under the constantly emerging web environment. It aims to explore the prevention, detection and investigation of cybercrimes. Cybercriminals are becoming increasingly adept at taking advantage of technology both to perform the criminal act and to avoid detection. While the use of computers and the Internet become even more popular, at the same time cybercriminals take advantage of existing and emerging vulnerabilities and increase their ways of attacking systems. It is believed that new types of crimes that involve computers and the web emerge on a constant basis.

We encouraged contributions describing innovative work on CEWE such as: electronic fraud, intrusion detection systems, forensic techniques for the investigation of cybercrimes, forensic imaging and volatile data, anti-forensic emerging trends, information security, information assurance and security management, cyber threats and future trends, risk assessment on information systems, incident response and investigation, malware trends, developments and forensic analysis, data mining and the malicious use of personal information, best practices and case studies, legal, policy and ethical issues related to cybercrime prevention and investigation, security and forensics in social networks and cybercriminal profiling. For CEWE 2013, we accepted 12 papers, which will be presented in 4 sessions.

Many people contributed to the success of CEWE 2013. First, we would like to thank the organizing committee of EIDWT 2013 International Conference for giving us the opportunity to organize the workshop. We would like to thank all the authors of the workshop for submitting their research works and for their participation. We are looking forward to meet them again in the forthcoming editions of the workshop.

Finally, we would like to thank the Local Arrangement Chairs for the local arrangement of the workshop.

We hope you will enjoy the workshop and have a great time in Xi’an, China.
