Proceedings of the

15th International Conference on
DISTRIBUTED COMPUTING SYSTEMS

May 30 - June 2, 1995  
Vancouver, Canada

Sponsored by
IEEE Computer Society Technical Committee on Distributed Processing

IEEE Computer Society Press
Los Alamitos, California
Contents

Message from the General Chair ................................................................. xi
Message from the Program Chair .............................................................. xii
Organizing and Program Committees ...................................................... xiii
Referees ..................................................................................................... xix

Keynote Address: “New Challenges in Distributed Computing”
Speaker: A.M. Van Tilborg — Office of Naval Research, USA

SESSION 1A: Tools and Environments
Chair: V. Shen — Hong Kong University of Science & Technology, Hong Kong
Software Tool Evaluation Methodology ................................................... 3
S. Hariri, S-Y. Park, R. Reddy, M. Subramanyan, R. Yadav, G.C. Fox, and M. Parashar
A Tool for Monitoring Software-Heterogeneous Distributed Object Applications ................. 11
K. Zielinski, A. Laureenowski, J. Szymaszek, and A. Uszok
Integrating Visualization Support into Distributed Computing Systems .................................. 19
B. Topol, J.T. Stasko, and V. Sunderam
MASSIVE: A Distributed Virtual Reality System Incorporating Spatial Trading .................. 27
C. Greenhalgh and S. Benford

SESSION 1B: Real-Time Communication
Chair: R. Gerber — University of Maryland, USA
Real-Time Causal Message Ordering in Multimedia Systems ......................... 36
F. Adelstein and M. Singhal
A New Protocol for Bandwidth Regulation of Real-Time Traffic Classes in Internetworks ........ 44
J. Liebeherr, J.F. Akyildiz, and D. Sarkar
A Distributed Table-Driven Route Selection Scheme for Establishing Real-Time Video Channels ...................................................................................................................... 52
C-C. Chou and K.G. Shin
Guaranteeing End-to-End Deadlines in ATM Networks ........................................... 60
A. Raha, S. Kamat, and W. Zhao

SESSION 1C: Consensus and Agreement
Chair: E. Nett — GMD, Germany
Fault-Tolerant External Clock Synchronization ........................................... 70
F. Cristian and C. Fetzer
Efficient Failure Discovery with Limited Authentication .................................... 78
M. Borcherting
Causal Separators for Large-Scale Multicast Communication .................................. 83
L.E.T. Rodrigues and P. Vertssimo
Coterie Templates: A New Quorum Construction Method .................................... 92
W.K. Ng and C.V. Ravishankar
SESSION 2A: Transaction Processing

Chair: E.A. Delis — Queensland University of Technology, Australia

Exploiting Transaction Semantics in Multidatabase Systems ................................................... 101
R. Rastogi, H.F. Korth, and A. Silberschatz

A Practical Technique for Asynchronous Transaction Processing ........................................... 110
W. Hseush and C. Pu

Distributed Lock Management for Mobile Transactions ......................................................... 118
J. Jing, O. Bukhres, and A. Elmagarmid

SESSION 2B: Communication Protocols and Software

Chair: Y. Matsushita — Keio University, Japan

MPI Programming Environment for IBM SP1/SP2 ................................................................. 127
H. Franke, C.E. Wu, M. Riviere, P. Patnaik, and M. Snir

I-TCP: Indirect TCP for Mobile Hosts ....................................................................................... 136
A. Bakre and B.R. Badrinath

Single Connection Emulation (SCE): An Architecture for Providing a Reliable Multicast
Transport Service ....................................................................................................................... 144
R. Talpade and M.H. Ammar

SESSION 2C: Mutual Exclusion and Deadlock Detection

Chair: R. Lea — Sony Corporation, Japan

A Distributed K-Mutual Exclusion Algorithm ........................................................................... 153
S. Bulgannawar and N.H. Vaidya

A Fast Distributed Modular Algorithm for Resource Allocation ............................................. 161
I. Rhee

An Efficient Distributed Deadlock Detection Algorithm ......................................................... 169
S. Lee and J.L. Kim

SESSION 3A: PANEL

"Computer Supported Cooperative Work — New Challenges or Old Problems?" ............... 180

Chair: T. Rodden — Lancaster University, UK

Panelists: P. Dourish — Rank Xerox Centre (Euro Parc), UK
Lennart Fahlen — Swedish Institute of Computer Science, Sweden
Chris Greenhalgh — Nottingham University, UK
Atul Prakash — University of Michigan, USA
John Reidl — University of Minnesota, USA

SESSION 3B: PANEL

"Future Distributed Embedded and Real-Time Applications Will Be Adaptive —
Meanings, Challenges and Research Paradigms" ................................................................. 183

Chair: A. Mok — University of Texas at Austin, USA

Panelists: Connie Heitmeyer — Naval Research Laboratory, USA
Kevin Jeffay — University of North Carolina, Chapel Hill, USA
Mike Jones — Microsoft, USA
C. Douglas Locke — Loral Federal Systems, USA
Ragnuthan Rajkumar — Software Engineering Institute, USA
Keynote Addresses:

“What Services Will Integrated-Services Networks Offer?”
Speaker: D. Ferrari — University of California at Berkeley, USA

“Integrating Persistent Object Bases with Communication: A New Direction for Object-Oriented Systems”
Speaker: B. Liskov — Massachusetts Institute of Technology, USA

SESSION 4A: Real-Time Distributed Systems
Chair: R. Rajkumar — SEI, Carnegie Mellon University, USA

Analysis of Resource Lower Bounds in Real-Time Applications ........................................ 188
R. Alqadi and P. Ramanathan
Schedulability-Oriented Replication of Periodic Tasks in Distributed Real-Time Systems .... 196
S-T. Cheng, S-I. Hwang, and A.K. Agrawala
Distributed Pipeline Scheduling: End-to-End Analysis of Heterogeneous, Multi-Resource Real-Time Systems ................................................................. 204
S. Chatterjee and J. Strosnider

SESSION 4B: Logging and Recovery
Chair: D. Taylor — University of Waterloo, Canada

Server Recovery Using Naturally Replicated State: A Case Study .................................... 213
M. Devarakonda, B. Kish, and A. Mohindra
Performance Evaluation of Three Logging Schemes for a Shared-Nothing Database Server ................................................................. 221
K-F. Wong
Message Logging: Pessimistic, Optimistic, and Causal ................................................ 229
L. Alvisi and K. Marzullo

SESSION 4C: Performance of Communication Systems
Chair: D.B. Johnson — Carnegie Mellon University, USA

Comparing Kernel-Space and User-Space Communication Protocols on Amoeba ................. 238
M. Oey, K. Langendoen, and H.E. Bal
Techniques for Global Optimization of Message Passing Communication on Unreliable Networks ................................................................. 246
N. Islam and R.H. Campbell
A Thread-Based Interface for Collective Communication on ATM Networks .................... 254
C. Huang, Y. Huang, and P.K. McKinley

SESSION 5A: Object-Based Systems
Chair: M. Ahamad — Georgia Institute of Technology, USA

An Object-Based Distributed Computing Environment Based on a Reflective Architecture ...... 263
T. Yokoyama, M. Saito, M. Shimada, and S. Murata
A Multiversion Concurrent Object Model for Distributed and Multiuser Environments ........ 271
T. Hirotsu, H. Fujii, and M. Tokoro
Adaptive Placement of Method Executions within a Customizable Distributed Object-Based Runtime System: Design, Implementation, and Performance ........................................ 279
M. Bandre, Y. Belhamissi, V. Issarny, I. Puaut, and J-P. Routeau
SESSION 5B: Remote Procedure Call and Group Communication

Chair: A. Arora — Ohio State University, USA

Constructing a Configurable Group RPC Service .......................................................... 288
M.A. Hiltunen and R.D. Schlichting

Newtop: A Fault-Tolerant Group Communication Protocol ........................................... 296
P.D. Ezhilchelvan, R.A. Macêdo, and S.K. Shrivastava

Configuration-Level Optimization of RPC-Based Distributed Programs ....................... 307
T-H. Kim and J.M. Purtilo

SESSION 5C: Communication Systems

Chair: A. Guha — Network Systems Corporation, USA

Selective Broadcast Data Distribution Systems ............................................................. 317
K.H. Yeung and T.S. Yum

An Efficient Optimal Reconfiguration Algorithm for FBRNs ........................................... 325
S.D. Kamat

Distributed Management by Delegation .................................................................................. 333
G. Goldszmidt and Y. Yemini

SESSION 6A: PANEL

“Intelligent Agents in Distributed Systems” ...................................................................... 342

Co-Chairs: J.J. Ordille — AT&T Bell Laboratories, USA

O. Drobnik — J.W. Goethe-University, Germany

Panelists: M. Genesereth — Stanford University, USA

Y. Lashkari — MIT Media Laboratory, USA

B. Selman — AT&T Bell Laboratories, USA

SESSION 6B: PANEL

“How are We Going to Pay for This? Fee-for-Service in Distributed Systems — Research and Policy Issues” .............................................................. 344

Chair: C. Clifton — Northwestern University, USA

Panelists: Peter Gemmel — Sandia National Labs, USA

Ed Means — U.S. Computer Services, USA

Matt Merges — AT&T Bell Laboratories, USA

Doug Tygar — Carnegie Mellon University, USA

Keynote Address: “Network Applications”

Speaker: I. Gopal — Networked Applications Services, IBM, USA

SESSION 7A: Monitoring and Testing

Chair: B.H.C. Cheng — Michigan State University, USA

Probing and Fault Injection of Protocol Implementations .............................................. 351
S. Dawson and F. Jahanian

Test Sequence Generation from Formal Specifications of Distributed Programs ............... 360
R.H. Carver and K.C. Tai

viii
Dynamic Techniques for Minimizing the Intrusive Effect of Monitoring Actions ........................................ 368
R. Gupta and M. Spezialetti

EVEREST: An Event Recognition Testbed .......................................................... 377
M. Spezialetti and S. Bernberg

SESSION 7B: Distributed Databases
Chair: J.E. Urban — Arizona State University, USA

Distributed Join Processing Using Bipartite Graphs ........................................ 387
P. Scheuermann and E.I. Chong

General Design of Grid-Based Data Replication Schemes Using Graphs and a Few Rules ........ 395
O. Theel and H. Pagnia-Koch

Maintaining Consistency of Data in Mobile Distributed Environments ................. 404
E. Pitoura and B. Bhargava

Specifying Weak Sets ........................................................................................ 414
J.M. Wing and D.C. Steere

SESSION 7C: Theory and Algorithms
Chair: B. Patt-Shamir — Northeastern University, USA

Distributed Algorithms for Detecting Conjunctive Predicates ................................ 423
V.K. Garg and C.M. Chase

Characterizing and Detecting the Set of Global States Seen by all Observers of a
Distributed Computation .................................................................................. 431
E. Fromentin and M. Raynal

Implementing Sequentially Consistent Shared Objects Using Broadcast and
Point-to-Point Communication ........................................................................ 439
A. Fekete, M.F. Kaashoek, and N. Lynch

A Competitive Analysis for Retransmission Timeout .............................................. 450
S. Dolev, M. Kate, and J.L. Welch

SESSION 8A: Distributed Systems Architecture
Chair: J. Torrellas — University of Illinois, USA

Write Caching in Distributed File Systems .......................................................... 457
K. Chen, R.B. Bunt, and D.L. Eager

Parallel Processing on Networks of Workstations: A Fault-Tolerant, High
Performance Approach .................................................................................... 467
P. Dasgupta, Z.M. Kedem, and M.O. Rabin

Hardware for Fast Global Operations on Workstation Cluster Multicomputers ........ 475
D.V. Hall and M.A. Driscoll

SESSION 8B: Task Allocation and Load Balancing
Chair: S. Tripathi — University of Maryland, USA

Performance Impact of Scheduling Discipline on Adaptive Load Sharing in Homogeneous
Distributed Systems .......................................................................................... 484
S. Dandamudi
Mapping Concurrently-Communicating Modules onto Mesh Multicomputers Equipped with Virtual Channels

B-R. Tsai and K.G. Shin

An Efficient Task Allocation Scheme for Two-Dimensional Mesh-Connected Systems

S-M. Yoo and H.Y. Youn

SESSION 8C: Specification and Implementation of Protocols

Chair: S. Chanson — University of British Columbia, Canada

Synthesis of Protocol Entities’ Specifications from Service Specifications in a Petri Net Model with Registers

H. Yamaguchi, K. Okano, T. Higashino, and K. Taniguchi

Distributed Implementation of Multi-Rendezvous in LOTOS Using the Orthogonal Communication Structure in Linda

K. Naik

Specification of a Secured Multi-Server MMS Protocol

Y. Dakroury, J.P. Elloy, and R. Ricordel

CLOSING SESSION: PLENARY PANEL

“Distributed Computing in 2010”

Chair: L.D. Wittie — State University of New York at Stony Brook, USA
