Conference Organizers .................................................................................... xiv
International Technical Program Committee ................................................ xvi

Keynote Address

Getting in Touch with Your Feelings about Software Architecture ................. 2
Rob Wojcik

Technical Papers

1A: Parallel and Distributed Computing and Systems

A Grid Scheduling Algorithm for Bag-of-Tasks Applications Using Multiple Queues
with Duplication ........................................................................................................ 5
Young Choon Lee and Albert Y. Zomaya

A VQ Compression Algorithm for a Multiprocessor System with a Global Sort
Collective Function .................................................................................................. 11
Akiyoshi Wakatani

Model the MPI Performance for Non-contiguous Data ...................................... 17
Thuy T. Le
Optimized Algorithm for Computing Invariants of Ordinary Petri Nets ................................................................. Chong-Fatt Law, Bah-Hwee Gwee, and Joseph S. Chang

1B: Software Metrics and Project Management

An Empirical Study to Investigate Software Estimation Trend in Organizations Targeting CMMI™ ................................................................. 38
Mehwish Nasir and H. Farooq Ahmad

Decoupling Metrics for Services Composition .............................................................................................................. 44
Kai Qian, Jigang Liu, and Frank Tsui

Improving Accuracy of Multiple Regression Analysis for Effort Prediction Model ....................................................... 48
Kazunori Iwata, Toyoshiro Nakashima, Yoshiyuki Anan, and Naohiro Ishii

An Approach to Analyzing the Windows and Linux Security Models .................................................................................. 56
Xinyue Song, Michael Stinson, Roger Lee, and Paul Albee

2A: Communication Systems and Networks

A Hierarchical Packet Scheduler for Differentiated Services in High-Speed Networks ...................................................... 63
Chin-Chi Wu, Hsien-Ming Wu, Chiou Moh, and Woei Lin

Design of Customer-Based AQM Routers to Achieve Fair Inter-server Bandwidth Allocation ........................................... 69
Hsien-Ming Wu, Chin-Chi Wu, and Woei Lin

Reducing the Requirement in FEC Codes via Capillary Routing .......................................................................................... 75
Emin Gabrielyon and Roger D. Hersch

Security Gateway for Accessing IPv6 WLAN ................................................................................................................... 83
Chih-Mou Shih and Shang-Juh Kao

Topology Discovery for Coexisting IPv6 and IPv4 Networks ............................................................................................ 89
I-Ping Hsieh and Shang-Juh Kao

2B: COMSAR Workshop I

A Distributed Topic Map Architecture for Enterprise Knowledge Management ............................................................. 96
Axel Korthaus, Stefan Henke, Markus Aleksy, and Martin Schader

Using Dynamic Slicing to Analyze Change Impact on Role Type Based Component Composition Model ........................ 103
Tie Feng and Jonathan I. Maletic

Mapping COSA Software Architecture Concepts into UML 2.0 .................................................................................... 109
Tahar Khammaci, Adel Smeda, and Mourad Oussalah
Multi-agent Testing Architecture for Monitoring and Analyzing the Performance of Web Applications

Huiiming Yu, Jin Zhang, and Jinsheng Xu

Analyzing Security Interoperability during Component Integration

Ebenezer A. Oladimeji and Lawrence Chung

3A: Data Mining, Data Warehousing and Database

Fault Tolerant Non-trivial Repeating Pattern Discovering for Music Data

Yu-lung Lo and Chun-yu Chen

A Study for Forecasting Water Supply Demand in the Area-K Waterworks Service Area

Yukio Maruyama and Hisashi Yamamoto

Incorporating Heterogeneous XML Formats Using Relational Database

Sungchul Hong and Yeong-Tae Song

Text Classification by Combining Grouping, LSA and kNN

Naohiro Ishii, Tsuyoshi Murai, Takahiro Yamada, and Yongguang Bao

3B: COMSAR Workshop II

Enhanced Facilitated Application Specification Technique (eFAST)

Karim Dad and Atif Neuman Jamil

Representing Security Goals, Policies, and Objects

Ebenezer A. Oladimeji, Sam Supakkul, and Lawrence Chung

Software Engineering for Pervasive Computing: An Outlook for Educational Reform

Gilda Pour

A Study on the Application of Six Sigma Tools to PSP/TSP for Process Improvement

Youngkyu Park, Hyuncheol Park, Hojin Choi, and Jongmoon Baik

TUG: An Executable Specification Language

Chia-Chu Chiang

4A: Data Mining AND Information Management Systems

Measuring the Benefits of Summarizing Quantitative Information in Pervasive Computing Systems

Faraz Rasheed, Young-Koo Lee and Sungyoung Lee

Mining Association Rules from Data with Missing Values by Database Partitioning and Merging

Takahiko Shintani
An Extended Cellular Automata Model for Data Mining of Land Development Data ...............................................................201
Gongzhu Hu and Yichun Xie

4B: Mobile/Wireless Computing and Internet Technology
and Applications

K-Interleaving Rendezvous Overlay Network Construction Scheme .........................................................................................208
Khaled Ragab, Yoshihiro Oyama, and Akinori Yonezawa

Session Initiation Protocol (SIP) Based Event Notification System
Architecture for Telemedicine Applications .................................................................................................................................214
A. Sadat, G. Sorwar, and M. U. Chowdhury

Hoarding and Prefetching for Mobile Databases ..........................................................................................................................219
Mariano Cravo Teixeira Neto and Ana Carolina Salgado

Enhancing the Horizons of Mobile Computing with Mobile Agent Components .......................................................................225
Gilda Pour and Nivedita Laad

A Framework for Developing Wireless Mobile Online Applications ..........................................................................................231
Chong-wei Xu

5A: Software Engineering and Information Engineering I

A Method to Generate C# Code from MDA/PSM for Enterprise Architecture .............................................................................238
Deuk Kyu Kum and Soo Dong Kim

Eliciting an Enhancive Maintenance Model in Three Organisations in Ghana ........................................................................244
Mira Kajko-Mattsson and Michael Bosu

Searching Pareto Solutions of Bi-objective NVP System Design Problem with Breadth First Search Method ..................................................252
Hidemi Yamachi, Hisashi Yamamoto, Yasuhiro Tsujimura, and Yasushi Kambayashi

Project Automation: Case Study on the NeOSS Project ..................................................................................................................259
Yong-kee Jeong, Jun-Suk Oh, and Hyun-min Lim

Raising Local Density for Object Reconstruction Using Auxiliary Points ..................................................................................265
Bin-Shyan Jong, Pai-Feng Lee, and Juin-Ling Tseng

On History-Sensitive Models of Interactive Queues ......................................................................................................................271
Walter Dosch and Wuttipong Ruanthong
5B: Information Management Systems and Management Information Systems and Technology Education and Training

Application Services Based on Personal Data Ontology ......................................................... 280
  Yu-Chen Chen and Shang-Juh Kao

Content Validating the B2E Portal User Satisfaction Instrument ........................................... 286
  Dewi Rooslani Tojib and Ly-Fie Sugianto

New Network Management System with Communication Control of the Client ....................... 292
  Kazuya Odagiri, Rihito Yaegashi, Masaharu Tadauchi, and Naohiro Ishii

A Web- and Problem-Based Learning System in Artificial Intelligence .................................. 299
  Victor R. L. Shen and Tong-Ying Juang

Enhancing Undergraduates’ Capabilities of Practice and Innovation to Meet the Regional Needs ................................................................. 305
  Yanqin Zhu, Jiwen Yang, and Qiaoming Zhu

6A: Image Processing and Pattern Recognition Track

A New Approach to Persian/Arabic Text Steganography ........................................................... 310
  M. Hassan Shirali-Shahreza and Mohammad Shirali-Shahreza

Collage Steganography .................................................................................................................. 316
  Mohammad Shirali-Shahreza and Sajad Shirali-Shahreza

Fast Polygonal Approximation Based on Genetic Algorithms .................................................. 322
  Yao-Hong Tsai

Image Features Extraction for Multimedia Database Content Description .......................... 327
  Shu-Sheng Hao

Irregular Patch for Image Synthesis ............................................................................................. 333
  Changzhen Xiong, Jing Huang, Dongxu Qi, and Jiancheng Zou

Gradient Non-linearity Correction of MR Images for Functional Radiosurgery ................... 338
  Tom S. Lee, Keith E. Schubert, and Reinhard W. Schulte

7A: Computer Architecture and Software Testing and Tools

A New Computer Architecture Using a New Program Driving Method .................................. 345
  Xiaobo Li, Xiangdong Cui, Xiaoxiang Ni, Chiyuan Ma, Jingfei Jiang,
  Huiping Zhou, Zhou Zhou, Ke Luo, and Jiangsha Deng

Analysis and Performance Results of a Fluid Dynamics Application on MASA Stream Processor ........................................................................ 350
  Mei Wen, Nan Wu, Changqing Xun, Wei Wu, and Chunyuan Zhang
Efficient BISR Techniques for Word-Oriented Embedded Memories with Hierarchical Redundancy

Shyue-Kung Lu, Chun-Lin Yang, and Han-Wen Lin

Performance of PGA (Programmable Graph Architecture) for Matrix Multiplications

Muling Peng, Sreekanth Ramani, K. Wendy Tang, and A. Yavuz Oruç

Program Analysis and Testing of Database Applications

S. K. Gardikiotis and N. Malevris

Towards Destructive Software Testing

Kiumi Akingbehin

8A: Software Engineering and Information Engineering II

Enabling Multiple Conferences in Recordable Virtual Collaboration

Meekyeong Kim, Chuleui Hong, and Yeong-Tae Song

Software Source Code Correlation

Robert Zeidman

Writing Use-Case with a Minimal Set of Words

Takao Osaki, Atsushi Kobayashi, and Takuo Kato

Mapping between Temporal Scripts of Animation Component and SMIL Document Using UML Sequence Diagram

Yan Ha and Roger Lee

Generating Java Skeletal Code with Design Contracts from Specifications in a Subset of Object Z

Sowmiya Ramkarthik and Cui Zhang

8B: Artificial Intelligence, Image and Signal Processing

Index Fund Optimization Using GA Based on Coefficients of Determination

Yukiko Orito, Jun Takano, Manabu Takeda, and Hisashi Yamamoto

Acoustic Pressure Minimization Using H₂ Control

Wen-Kung Tseng and Shun-Cheng Lien

Adaptive Sampling via Histogram Equalization Using an Active Walker Model

Oladipo O. Fadiran, Péter Molnár, and Lance M. Kaplan

9A: Information Assurance

Information Relevance Management Model—A New Strategy in Information Security Management in the Outsourcing Industry

Yulin Dai, Shiying Li, and Yi Luo
Research on the Intelligent Network Storage Platform for the Military Information Source ................................................................. 439
   Lianxing Jia, Zhifeng Chen, Chenhui Li, and Dan Feng

Improving the Usability of a Virtual Assembly Environment with the Integration of Multi-sensory Feedback ................................................................. 444
   Ying Zhang, Adrian Travis, Terrence Fernando, and Hannan Xiao

9B: Intelligent Agent Technology and Agent Based Systems

Behavior Coordination Mechanism for Intelligent Home ......................................................................................................................... 452
   Minkyoung Kim and Hyun Kim

Solving Distributed Mutual Exclusion Using Cooperating Mobile Agents .................................................................................................................... 458
   F. Ahmad, N. Santoro, A. Nayak, N. Goel, A. Patnaik, and A. Srivastava

Towards Successful Automated Negotiations Based on Neural Networks .................................................................................................................. 464
   Ioannis V. Papaioannou, Ioanna G. Roussaki, and Miltiades E. Anagnostou

10A: Web Engineering and Applications Track

Browser Compatible XLink Processing ......................................................................................................................... 473
   Tseng-Chang Yen, Felix Hsu, and Shang-Juh Kao

Integration of QoS Queuing Schedules to QoS Caching Schemes .................................................................................................................... 479
   Yong Zhang, Wenying Feng, and Richard Hurley

Web-Based System for Electronic Navigational Charts Using GML and SVG .................................................................................................................. 485
   Seong Chul Kam, Seong Dae Lee, Hyu Chan Park, and Xiaofang Zhou

10B: Data Mining, Software Engineering, and Intelligent Agent Technology

Modeling the Network of Loyalty-Profit Chain in Chemical Industry ........................................................................................................... 492
   Carl Lee, Tim Rey, Olga Tabolina, James Mentele, and Tim Fletcher

Empirical Validation of Test-Driven Pair Programming in Game Development ........................................................................................................... 500
   Shaochun Xu and Vaclav Rajlich

Web-Based Intelligent Tutoring Systems in K-12 Settings ......................................................................................................................... 506
   Kausalai Kay Wijekumar and James Spielvogel

Author Index .................................................................................................................................. 511
