Welcome Message from the General Chair

On behalf of the Organizing Committee, I would like to welcome you all coming to Cuernavaca to participate in the 2014 IEEE International Conference on Mechatronics, Electronics and Automotive Engineering. It will provide a stimulating forum for scientists, engineers, educators and students from all Latin American. It will be a great opportunity to disseminate their new research findings and exchange information on merging areas of research.

Our conference is organized by the IEEE Student Branches of Instituto de Ingenieros de Morelos. This is an exemplary collaboration between the two leading branches. We are very pound to present an excellent program with 40 papers in oral sessions, which represent the best up-to-date results in their respective research areas.

The organization of ICMEAE is based on a very strong volunteer involvement, and it is supported by the skillful professional help of the IEEE Computer Society. Our work has been supported by the Technical Committee which plays a key role in coordinating the reviews, formulating the acceptance/rejection decisions, and completing other programmed tasks.

I highly appreciate the time and energy spent by our volunteers who help us to make ICMEAE a great success. At the fundamental level, I would like to emphasize on the significant work of the Technical Committee. Thank you very much for the days, and often nights, spent on producing the quality reviews. The members of the Organizing Committee work diligently in various areas of activities towards our common goal.

Cuernavaca provides an excellent environment for our conference at the Universidad Autónoma del Estado de Morelos. I wish you a productive and enjoyable time during your stay in Cuernavaca.

Leoncio Aguilar Negrete

General Chair
