Welcome to the 2013 International Workshop on Software Engineering for Computational Science & Engineering. We are excited about the program for this year. The submissions represented a good mix of papers from the software engineering perspective and papers from the computational science & engineering perspective. This year we accepted two types of papers: full papers (10 pages) and position papers (4 pages). We received a total of 20 submissions (15 full papers and 5 position papers). After a thorough review process, the program committee and organizing committee selected 10 full papers and 4 position papers for inclusion in this year’s program.

Thanks to the generous support of the United States National Science Foundation (NSF), we were able to award some travel grants to encourage broader participation in this year’s workshop. The primary goal of this workshop is to facilitate interaction among researchers from SE and CSE, who do not normally have opportunities to interact. The workshop will be organized with paper presentations in the morning to get attendees thinking about various topics. We will then spend a large portion of the afternoon in smaller interdisciplinary breakout groups that allow participants to discuss in more depth the issues that arise in the morning.

The members of the 2013 Organizing Committee include:

- Jeffrey Carver, University of Alabama, USA, carver@cs.ua.edu Chair
- Tom Epperly, Lawrence Livermore National Laboratory, USA, epperly2@llnl.gov
- Lorin Hochstein, Nimbis Services, USA, lorin@nimbisservices.com
- Valerie Maxville, IVEC, Australia, maxville@ivec.org
- Dietmar Pfahl, University of Tartu, Estonia, dietmar.pfahl@ut.ee
- Jonathan Sillito, University of Calgary, Canada, sillito@ucalgary.ca

Additional Program Committee members include:

- Roscoe Bartlett, Oak Ridge National Laboratories, USA, bartlettra@ornl.gov
- Ian Gorton, Pacific Northwest National Laboratory, USA, ian.gorton@pnl.gov
- Michael Heroux, Sandia National Laboratories, USA, maherou@sandia.gov
- Greg Pope, Lawrence Livermore National Laboratory, USA, pope12@llnl.gov
- Damian Rouson, Sandia National Laboratories, USA, rouson@sandia.gov
- James M. Willenbring, Sandia National Laboratories, USA, jmwilie@sandia.gov

Acknowledgments

We would like to acknowledge the generous support of NSF in providing travel grants (NSF-1321448).
