

2000

19th Annual Symposium on Foundations of Computer Science

(Formerly called the Annual Symposium on Switching and Automata Theory)

OCT. 16-18, 1978

ANN ARBOR, MICHIGAN

sponsored by
the IEEE Computer Society's Technical Committee on
Mathematical Foundations of Computing
in cooperation with
the ACM Special Interest Group for Automata and Computability Theory,
The University of Michigan

IEEE 78 CH1397-9 C

Additional copies available from:

IEEE Computer Society
5855 Naples Plaza, Suite 301
Long Beach, California 90803

or

IEEE Service Center
445 Hoes Lane
Piscataway, NJ 08854

Copyright and Reprint Permissions:

Abstracting is permitted with credit to the source. Libraries are permitted to photocopy beyond the limits of U.S. copyright law for private use of patrons those articles in this volume that carry a code at the bottom of the first page, provided the per-copy fee indicated in the code is paid through the Copyright Clearance Center, P. O. Box 765, Schenectady, NY 12301. Instructors are permitted to photocopy isolated articles for noncommercial classroom use without fee. For other copying, reprint or republication permission, write to Director, Publishing Services, IEEE, 345 E. 47 Street., New York, New York 10017. All rights reserved. 1978 NINETEENTH ANNUAL SYMPOSIUM ON
 FOUNDATIONS OF COMPUTER SCIENCE
 ANN ARBOR, MICHIGAN
 OCTOBER 16 - 18, 1978

TABLE OF CONTENTS

<u>Monday, October 16</u>	<u>Page</u>
<u>Session I: S. Ginsburg, Chairman</u>	
Description and Analysis of an Efficient Priority Queue Representation J. Françon, G. Viennot and J. Vuillemin	1
A Dichromatic Framework for Balanced Trees Leo J. Guibas and Robert Sedgewick	8
Should Tables Be Sorted? Andrew C. Yao	22
A Data Structure for Orthogonal Range Queries George S. Lueker	28
Complexity of Solvable Cases of the Decision Problem for the Predicate Calculus Harry R. Lewis	35
GO is Pspace Hard David Lichtenstein and Michael Sipser	48
The Complexity of Checkers on an $n \times n$ Board - Preliminary Report A. S. Frankel, M. R. Garey, D. S. Johnson, T. Schaefer and Y. Yesha	55
<u>Session II: S. R. Kosaraju, Chairman</u>	
One-Way Log-Tape Reductions J. Hartmanis, H. Immerman and S. Mahaney	65
Halting Space-Bounded Computations Michael Sipser	73
Two Theorems on Random Polynomial Time Leonard Adleman	75
Improved Bounds on the Problem of Time-Space Trade-Off in the Pebble Game (Preliminary Version) Rüdiger Reischuk	84
Alternating Pushdown Automata (Preliminary Report) Richard E. Ladner, Richard J. Lipton and Larry J. Stockmeyer	92
On Tape -- Bounded Probabilistic Turing Machine Transducers (Extended Abstract) Janos Simon, John Gill and James Hunt	107
On Alteration (Preliminary Version) Wolfgang J. Paul, Ernst J. Praub and Rüdiger Reischuk	113
<u>Tuesday, October 17</u>	
<u>Session III: E. P. Friedman, Chairman</u>	
Equality Languages, Fixed Point Languages and Representations of Recursively Enumerable Languages Joost Engelfriet and Grzegorz Rosenberg	123
Computable nondeterministic Functions Ashok K. Chandra	127

Session III - Continued

On the Power of the Compass (or, Why Mazes Are Easier to Search Than Graphs)
Manuel Blum and Dexter Kozen 132

Limited Subsets of a Free Monoid
Imre Simon 143

Lower Bounds on Information Transfer in Distributed Computations
Harold Abelson 151

An Optimal Lower Bound on the Number of Total Operations to Compute 0-1 Polynomials Over the
Field of Complex Numbers
Jean-Paul Van de Wiele 159

Strassen's Algorithm is not Optimal Trilinear Technique of Aggregating, Uniting and Canceling for
Constructing Fast Algorithms for Matrix Operations
V. Ya. Pan 166

Session IV: N. Pipenger, Chairman

A Decidability Result for a Second Order Process Logic
Robert Parikh 177

Consistent and Complete Proof Rules for the Total Correctness of Parallel Programs
Lawrence Flon and Norihisa Suzuki 184

Model Theoretic Aspects of Computational Complexity
Richard J. Lipton 193

On Recursive Equations Having a Unique Solution
Bruno Courcelle 201

On the Algebra of Order (Extended Abstract)
Daniel J. Lehmann 214

Data Types as Initial Algebras: A Unification of Scottery and ADJery (Extended Abstract)
Akira Kanda 221

Wednesday, October 18

Session V: R. Rivest, Chairman

A New Algorithm for the Maximal Flow Problem
Zvi Galil 231

A Fast Algorithm for Single Processor Scheduling
Barbara Simons 246

Selection and Sorting with Limited Storage
J. I. Munro and M. S. Paterson 253

Improving the Bounds on Optimal Merging
C. Christen 259

On Lifted Problems (Preliminary Report)
C. K. Yap 267

On the Average-case Complexity of Selecting k - th Best
Andrew C. Yao and F. Frances Yao 280

Author Index 290
