Table of Contents

Message from the Conference and the Workshop Chairs............................................................ xv
Message from the Program Chairs .............................................................................................. xvi
Organization Staff ....................................................................................................................... xvii
Committee Members ...................................................................................................................... xviii
Keynote 1 ......................................................................................................................................... xxiii
Keynote 2 ......................................................................................................................................... xxiv

Lifetime Optimized Methods of Correlated Data Gathering on Sensor Networks ........................................ 3
   Xun Zhou, Shengfei Shi, Jizhou Luo, and Wei Zhang

A \((t, n)\)-Threshold Verified Multi-secret Sharing Scheme Based on ECDLP ........................................... 9
   Ruanhua Shi, Hong Zhong, and Liusheng Huang

Coverage-Preserving Data Gathering in Wireless Sensor Networks .................................................... 14
   Hongli Xu, Liusheng Huang, Jumin Wu, and Yang Wang

Tasks Allocation for Real-Time Applications in Heterogeneous Sensor Networks for Energy Minimization.......................................................... 20
   Jinghua Zhu, Jianzhong Li, and Hong Gao

Optimization Framework for Distributed Clustering Scheme in Wireless Sensor Networks .................... 26
   Yongxuan Lai, Xiaobo Fan, Hong Chen, and Tingting Xie

A Service-Based Workflow Model for Virtual Enterprise ......................................................................... 32
   Wu Shaofei, Wei Siying, and Zhang Jinlong

An Approach for Web Services Composition Based on QoS and Discrete Particle Swarm Optimization .......................................................... 37
   Ming Chen and Zhen-wu Wang

A Web Service Discovery Algorithm Based on Dynamic Composition .................................................. 42
   Fu zhi Zhang, Yan Wang, and Lin Wang
Fuzzy Integrative Performance Evaluation for Supply Chain System ........................................................ 47
Jianhua Yang

A Novel Method for Moving Object Detection in Foggy Day ................................................................. 53
Gong Chen, Heqin Zhou, and Jiefeng Yan

The Wavelet-Based Contourlet Transform for Image Fusion .................................................................. 59
Lei Tang and Zong-gui Zhao

Multilevel Minimum Cross Entropy Threshold Selection Based on Quantum
Particle Swarm Optimization ....................................................................................................................... 65
Yong Zhao, Zongde Fang, Kanwei Wang, and Hui Pang

A New Model of Printer Color Management Based on Legendre Neural Network ................................... 70
Li Xinwu

A Cheating Detection Mechanism Based on Fuzzy Reputation Management
of P2P MMOGs ........................................................................................................................................... 75
Xiang-bin Shi, Liu Fang, Du Ling, Chen Xiao-hong, and Xing Yuan-sheng

Research on Adaptive Error Concealment for Video Transmission over Packet-Lossy Channel ............. 81
Yin Ming, Xie Yun, Guo Fen, and Cai Shuting

A Novel Approach to Commercial Detection in News Video ................................................................. 86
Shijin Li, Hao Li, and Zhijian Wang

Automatic Audio Classification and Speaker Identification for Video Content Analysis ......................... 91
Shu-Chang Liu, Jing Bi, Zhi-Qiang Jia, Rui Chen, Jie Chen, and Min-Min Zhou

Identifying Code for Directed Graph ........................................................................................................... 97
Yi-Chun Xu and Ren-Bin Xiao

Examination of Processing Load in Applying DACS Scheme to Practical Network .................................. 102
Kazuya Odagiri, Rihito Yaegashi, Masaharu Tadauchi, and Naohiro Ishii

A Hop-Distance Algorithm for Self-Localization of Wireless Sensor Networks .................................... 108
Dali Zhao, Yunhui Men, and Linliang Zhao

Internet Applications Usage Accounting Based on Flow ........................................................................ 113
Zhenqi Wang and Jin Liu

The Research on the Construct Technology of the Test System Based on the Network ............................ 117
Qian Feng and Meng Chen

A Hybrid and Efficient Scheme of Multicast Source Authentication ....................................................... 123
Jin-xin He, Gao-chao Xu, Xiao-dong Fu, and Zhi-guo Zhou

New Key Insulated Signature Scheme: Mitigate the Damage of Key Exposure
in Mobile Agents ........................................................................................................................................... 126
Renwang Su

Identity-Based Cryptography for Grid ....................................................................................................... 132
Hongwei Li and Shixin Sun
The Computer Bracket Pressure Monitor System of Fully Mechanized Coalface in Coal Mine Based on CAN Bus

Zhang Yong, Xiang-hong Yan, Song Yang, and Zhu Hong-mei

A Framework for Reliability Computation of the IP Network

Tao Yu, Shanzhi Chen, Ming Ai, Xin Li, Yuhong Li, and Zhen Qin

Numerical Solution of a Type of Nonlinear Parabolic Equations

Lili Wang and Wei Gu

Positive Solutions of m-point Conjugate Boundary Value Problems

Shuli Wang and Jianming Zhang

Existence of Nonoscillatory Solution for Second Order Nonlinear Neutral Delay Differential Equation

Jinzhu Zhang, Zhen Jin, and Huimin Zhang

Two Dimensional Pattern Formation of Prey-Predator System

Hongxia Shen and Zhen Jin

Quantum Network Based on Multiparty Quantum Secret Sharing

Hongyang Ma and Bingquan Chen

Quantum Information Security Protocols and Quantum Coding Theory

Xin Lü and Zhi Ma

P2P Trust Model: The Resource Chain Model

Sinjae Lee, Shaojian Zhu, and Yanggon Kim

Network Protocols Analyzing by an Environmental Bisimulation Method

Min Gan, Guoying Yue, and Hongfa Wang

A Rapid Grouping Aggregation Algorithm Based on the Multi-dimension Hierarchical Encoding

Kong-fa Hu, Zhen-zhi Gong, and Qing-li Da

Obtaining Fuzzy Control Query Table by Data Mining

Gao Jun

Coal Thickness Prediction Based on Support Vector Machine Regression

Li Zhengwei, Xia Shixiong, Niuqiang, and Xia Zhianguo

BDA Information Management and Decision Support Based on DW

Ma Zhi-jun, Chen Li, and Zhang Yi-zhen

Battle Damage Assessment Based on Bayesian Network

Ma Zhi-jun, Shi Quan, and Li Bin

Infrared Point Target Detection and Tracking Based on DSP

Zhao Hongwei, Zhang Xiao-lin, and Qi Yi-ming

Intelligent Window Based on Embedded System

Jingwen Tian, Meijuan Gao, and Jin Li

Dependable Distributed Embedded System Assessment Platform Design

Qiang Huang, Liang XiaoFeng, and Zhu Yingying
Application of Embedded System in Construction Machinery ................................. 406
Ming-shan Liu and Yuan Zhou

A Web Services Based Email Extension for Remote Monitoring of Embedded Systems ........ 412
Peng Liu, Guojun Dai, and Tingting Fu

Mining User's Interest from Reading Behavior in E-Learning System ................................ 417
Yongquan Liang, Zhongying Zhao, and Qingtian Zeng

An Approach to Build Accessible Grid Service .......................................................... 423
Yin Jie, Wang Yue-Xuan, and Wu Cheng

A Research for Quality Preservation Methodology for SOA Environment ...................... 429
Youngkon Lee and Gwyduk Yeom

Study on Classification Algorithm of Multi-subject Text ................................................. 435
Yu-ping Qin, Qing Ai, Xiukun Wang, and Xiang-na Li

Survey of Public Key Digital Watermarking Systems ................................................... 439
Rongsheng Xie, Keshou Wu, Jiangbo Du, and Chunguang Li

An Automatic Target Detection Post-Processing Algorithm Based on Swarm Intelligence ...... 444
Chen Zhuo, Liu Xiang-shuang, and Zhuang Xiao-dong

Application of Multi-agent for Collaborative Product Design Engineering .................... 450
Yan Li

The Application of Particle Swarm Optimization Algorithm in Training Forward Neural Network ........................................................................................................ 455
Song Shao-zhong, Zhang Li-biao, and Shu-hua

Studies on CAD Systems with Artificial Intelligence ..................................................... 458
Jun Wang and Sun Huixue

Research on Detecting Method of Submarine Oil Pipelines Corrosion Degree Based on Chaos Genetic Algorithm Neural Network ......................................................... 464
Meijuan Gao, Jingwen Tian, and Kai Li

Low Dimensional Simplex Evolution – A Hybrid Heuristic for Global Optimization ............. 470
Changtong Luo and Bo Yu

An Enhancement Dynamic Contract Net Protocol ......................................................... 475
Zhao-Wen Wei, Jun-Yan Yan, and Yun-Peng Ou

Study on the Property of Training Samples and Learning Space with Genetic Algorithms .......... 481
Jingsong He, Jian Tang, and QianSheng Fang

Research on Lossless Image Compression Algorithms Using Fermat Number Transform .......... 487
Zhang Hong, Cai Zhengxing, Yang Fan, and Wei Wei

Maximum Variance Image Segmentation Based on Improved Genetic Algorithm .................. 491
Chun-mei Wang, Su-zhen Wang, Chong-ming Zhang, and Jun-zhong Zou

Distortion Analysis in Scalable Image Compression Scheme Based on Efficient Codebook Selection ................................................................................................. 495
Muhammad Kamran, Haroon-ur-Rashid Khan, and Shi Feng
Fusion of ICA Spatial, Temporal and Localized Features for Face Recognition ................................................................. 501
   Jiajin Lei and Chao Lu

Local and Global Features Extracting and Fusion for Microbial Recognition ................................................................. 507
   Li Xiaojuan, Chen Cunshe, Liang Anbo, and Shi Yan

Distributed Parallel Algorithm for Nonlinear Optimization without Derivatives ................................................................. 512
   Congying Han, Guoping He, Huanqing Cui, and Xuping Zhang

Selection of the Order of Autoregressive Models for Host Load Prediction in Grid ................................................................. 516
   Jiuyuan Huo, Liqun Liu, Li Liu, Yi Yang, and Lian Li

An Integrated Prefetching and Caching Scheme for Mobile Web Caching System ................................................................. 522
   Beihong Jin, Sihua Tian, Chen Lin, Xin Ren, and Yu Huang

A Fault-Tolerant Mutual Exclusion Resource Reservation Protocol for Clustered Mobile Ad Hoc Networks ......................... 528
   Mohammad Moallemi, Mohammad Hossien Yaghmaee Moghaddam, and Mahmoud Naghibzadem

Time Synchronization with Extended Clock Model for Wireless Sensor Networks ................................................................. 534
   Liming He

Analysis of Communication Traffic Characteristics of Two-Hop-Relay Cellular System in the Dead Spots ........................................ 540
   Wei-feng Lu and Meng Wu

LSMR: A Label Switching Multipath Routing Protocol for Ad Hoc Networks ................................................................. 546
   Wei Rong, Muqing Wu, and Tianhang Yu

A Numerical Prediction Product FNN Prediction Model Based on Condition Number and Analog Deviation .......................... 552
   Long Jin and Xvming Shi

The Study of Compost Quality Evaluation Modeling Method Based on Fuzzy Neural Network for Sewage Treatment .................. 558
   Jingwen Tian, Meijuan Gao, and Yujuan Xiang

A Nonparametric Approach to Pricing Convertible Bond via Neural Network ................................................................. 564
   Wei Zhou, Meiying Yang, and Liyan Han

A Modified SOFM Segmentation Method in Reverse Engineering ................................................................. 570
   Xue-mei Liu, Shu-sheng Zhong, Xiao-liang Bai, and Xue-mei Liu

Automatic Text Summarization Based on Lexical Chains and Structural Features ................................................................. 574
   Lei Yu, Jia Ma, Fuji Ren, and Shingo Kuroiwa

Hybrid Application on Job-Shop Scheduling by Genetic Algorithm and MAS Spring-Net ............................................................. 579
   Dong Yumin and Xiao Shufen

Parallel Analysis of Polymorphic Viral Code Using Automated Deduction System ................................................................. 585
   Ruo Ando

A Double Level Granularity for Multimedia on Demand System ..................................................................................... 593
   Xiaoguang Liu, Gang Wang, and Jing Liu
Adaptive Replication Based Security Aware and Fault Tolerant Job Scheduling for Grids.............................................................................................................. 597
   Congfeng Jiang, Cheng Wang, Xiaohu Liu, and Yinghui Zhao

Numerical Simulation of a Difference Scheme Applied in Image Processing Based on Four-Order PDEs............................................................... 603
   Lijie Zhang, Hui Liu, and Yan Wang

Recognizing Humans Based on Gait Moment Image.......................................................... 606
   Qinyong Ma, Shenkang Wang, Dongdong Nie, and Jianfeng Qiu

A Phase Unwrapping Algorithm for 3D Reconstruction .................................................. 611
   H. Zhang, H. Su, and X. Y. Su

A Tristate Approach Based on Weighted Mean and Backward Iteration.............................. 616
   Yanhua Ma, Chuanjun Liu, and Haiying Sun

Multifractal and R/S Analysis of Protein Structure .......................................................... 622
   Zheng Tingting, Cheng Jiaxing, Mao Junjun, and Song Jie

Quality Assessment of Beef Based of Computer Vision and Electronic Nose ..................... 627
   Chen Cunshe, Li Xiaojuan, and Yuan Huimei

Double Unmanned Aerial Vehicle’s Path Planning for Scout via Cross-Entropy Method .......... 632
   Jinquan Wang, Xiaoguang Gao, Jianguo Shi, and Zhengsheng Li

A PACA-Based Multicast Routing Algorithm................................................................. 636
   Ziqiang Wang, Xia Sun, and Dexian Zhang

A Formal Approach to Specifying Architecture Aspects and Their Weaving Logic ............. 640
   Chunhua Yang and Jiancheng Wan

A Lightweight Value-Based Software Architecture Evaluation ........................................ 646
   Chang-Ki Kim, Dan-Hyung Lee, In-Young Ko, and Jongmoon Baik

Mapping Software Design Changes to Source Code Changes........................................... 650
   Xiangchen Tan, Tie Feng, and Jiachen Zhang

The Management and Validation of Business Rules in Telecom Operator’s Settlement and Apportion System .................................................................... 656
   Biying Lin and Yanhui Zhang

A Scalable Peer-to-Peer Overlay for Applications with Time Constraints ......................... 662
   Bo Liu and Yansheng Lu

The Research of Local Area Storage Grid System............................................................ 668
   Peihe Tang and Hao Liu

A New Double Scheduling DBA Algorithm for Next Generation Access Network ................ 673
   Wei Chen, Jingtao Song, Jinan Leng, and Hanyang Lu

Organization Technology of Mobile Peer-to-Peer Network Based on Mobile Unit ................ 679
   Ye Liang and Lin-lin Ci
Extended Mobility Management Challenges over Cellular Networks Combined with Cognitive Radio by Using Multi-hop Network.................................................................................... 683
   Xiuhua Fu, Wenan Zhou, Junli Xu, and Junde Song

A Policy-Based Energy Efficient Clustering Scheme for Wireless Sensor Networks ....................... 689
   Min Xiao, Gaolin Chen, and Debao Xiao

An Adaptive Counter Propagation Network .......................................................................................... 695
   Yihong Dong, Chao Sun, and Xiaoying Tai

A Dyeing Color Matching Method Combining RBF Neural Networks with Genetic Algorithms .............. 701
   Hai-tao Li, Ai-song Shi, and Bing-sen Zhang

Aerodynamic Parameter Fitting Based on Robust Least Squares Support Vector Machines ............................................................ 707
   Xusheng Gan, Hongcai Zhang, Yongmei Cheng, and Chao Shi

Assessment on Fault-Tolerance Performance Using Neural Network Model Based on Ant Colony Optimization Algorithm for Fault Diagnosis in Distribution Systems of Electric Power Systems ......................................................................................................... 712
   Zhisheng Zhang and Yaming Sun

Efficient Partially Blind Signature from LFSR............................................................................................ 717
   Zheng Gong, Yu Long, and Kefei Chen

An Approach to Convert Any Threshold Signature into a Threshold Group Signature .......................... 723
   Guowen Li, Jia Yu, Rupeng Li, and Daxing Li

A Study of Secure Multi-party Ranking Problem....................................................................................... 727
   Wen Liu, Shou-Shan Luo, and Ping Chen

A Survey on Failure Prediction of Large-Scale Server Clusters ............................................................... 733
   Zhenghua Xue, Xiaoshe Dong, Siyuan Ma, and Weiqing Dong

Alert Verification Based on Attack Classification in Collaborative Intrusion Detection ......................... 739
   Min Xiao and Debao Xiao

A Hybrid Parallel Algorithm for Complex Decision Problem Optimization ........................................... 745
   Yan Luo and Changrui Yu

Eliminating Redundant Communication of Code Generation for Distributed Memory Machines .............................. 751
   Ya Nan Shen, Rong Cai Zhao, and Lei Wang

Equivalence of the Oscillation of Two Coupled Difference Systems .................................................. 757
   X. Y. Zeng

On the Higher Order Difference Equation $x_{n+1} = (x_{n-k+1}) / (-1+x_{n}x_{n-1}\cdots x_{n-k+1})$ 762
   L. Y. Wang, D. C. Zhang, and X. Y. Zeng

Periodic Growing of Two Populations Intergrowth System....................................................................... 766
   Ying Gao

Positive Solutions of m-point Boundary Value Problems for Second Order Differential Equations with an Advanced Argument................................................................. 770
   Yanping Guo, Yunhai Wang, and Changlong Yu
