2009 Sixth Web Information Systems and Applications Conference

WISA 2009

Table of Contents

Message from General Co-chairs ................................................................. ix
Message from Program Committee Co-chairs ........................................... x
Conference Organization ............................................................................. xi
Program Committee .................................................................................... xii
Additional Reviewers .................................................................................. xiii

Session 1A: Web and Database Technology

An Efficient Method for Constructing Personal DataSpace .................................................. 3
   Yukun Li, Xiaofeng Meng, and Yubo Kou
A New Cache Management Approach for Transaction Processing on Flash-Based Database .......................................................................................................................... 9
   Da Zhou, Xiaofeng Meng, and Zhichao Liang
The Research of Key Technology in Flash-Based DBMS ..................................................... 15
   Liu Lin and Xu Lizhen

Session 1B: Web Information Management and Analysis Technology

A Supervised Local Linear Embedding Based SVM Text Classification ................................. 21
   Li Youwen, Xia Shixiong, and Zhou Yong
XML Schema Based Compression Technology over XML Data Stream .............................. 27
   Xiaolin Zhang, Guofeng Zhai, and Rong Tian
Model Design on DAS and Research of XML Encrypted Data Querying ............................... 32
   Xia Shi-xiong, Ke Yu-Yi, and Wang Chu-jiao
An Improved Image Matching Target Tracking Algorithm .................................................. 37
   Ge Xin, Xie Hong, and Liu Yuan
Research of Morphological Wavelet Transformation in Fingerprint Image
Preprocessing ..............................................................................................................................................................41
   Jing Xiaoping, Yi Shijun, Zhu Jing, Cheng Heping, and Liu Naiqi

Session 2A: Web Information System Security and Quality Assurance
A Secure Web-Based Watermarking Scheme for Copyright Protection .................................................................47
   Tian Zhou and Li Li
A Multi-objective DR Service Deployment Algorithm Based on Improved AntNet-CO ..................................................51
   Zhibao Huang, Min Xie, Yanhuang Jiang, Haitao Chen, and Shaoshuai Wang
A Quick Testing Model of Web Performance Based on Testing Flow and its Application ..................................................57
   Guangzhu Jiang and Shujuan Jiang
DFTT4CWS: A Testing Tool for Composite Web Services Based on Data-Flow ..............................................................62
   Jun Hou and Lei Xu

Session 2B: Web Information Mining and Retrieval
An Adjusted-Edit Distance Algorithm Applying to Web Environment .................................................................71
   Mingdong Zhu, Derong Shen, Tiezeng Nie, and Yue Kou
Discovering Relationships among Data Resources in DataSpace ............................................................................76
   Yanlei Dong, Derong Shen, Tiezeng Nie, and Yue Kou
An Approach of Community Detecting Based on Block Level Link Analysis .......................................................82
   Ding Hui and Nan Yang

Session 3A: Semantic Web and Ontology
Measuring Semantic Similarity Based on WordNet .................................................................................................89
   Zhongcheng Zhao, Jianzhuo Yan, Liying Fang, and Pu Wang
The Concept Similarity Computation Based on Individual Preferences .................................................................93
   Shuai Wang, Fang Yuan, Ming Zhang, and Yu Wang
An Approach to Improving the Efficiency of Business Services Instantiation
Utilizing Inverted Indexing ........................................................................................................................................97
   Peng Zhang, Jing Wang, and Yanbo Han

Session 3B: Web Services and SOA
A Novel Clustering Framework for Web Service in MANET ..................................................................................109
   Cheng Zhang, Ziyu Chen, Qing-sheng Zhu, and Hui-jun Liu
A Method for Detecting Behavioral Mismatching Web Services ...........................................................................116
   Sheng Wang, Guangquan Zhang, Xiaofang Zhang, and Yang Yang
Modeling and Analysis for Web Services Composition Based on Dynamic Software Architecture ........................122
   Guangquan Zhang, Mei Rong, Ling Wang, Yali He, and Hui Wei
An Efficient Service Substitution Algorithm Based on Temporal Composite Behavior Graph

Ying Yin, Xizhe Zhang, and Bin Zhang

Business-Pattern-Evolution Based Service Composition with Flexibility

Lei Yang, Yu Dai, and Bin Zhang

**Session 4A: Web Application Framework and Architecture**

An Extensible Framework for Internet Booking Application Based on Rule Engine

Yong Zhang, Jie Zhao, and Chunxiao Xing

PIST: A P2P IR Model for Social-Tagging Network

Wang Zhenhua, Shen Derong, and Yu Ge

A Method of Predicting Users' Behaviors Based on Inter-transaction Association Rules

Yanyu Zhang and Yonggong Ren

A Semantic-Based Approach to Grid Service Matching

Meimei Liu, Peifeng Li, Qiaoming Zhu, and Qin Ji

A Novel Approach to Grid Service Composition with QoS Global Optimization

Wei Huang, Peifeng Li, and Qiaoming Zhu

**Session 4B: Deep Web Technology**

DSSM: A Data Sources Selection Model for Deep Web

Zhendong Qu, Derong Shen, Ge Yu, Yue Kou, and Tiezheng Nie

A Deep Web Complex Matching Method Based on Association Mining and Semantic Clustering

Yang Xiaqin, Ju Shiguang, and Cao Qinghuang

Improved C4.5 Algorithm for the Analysis of Sales

Rong Cao and Lizhen Xu

**Workshop on Semantic Web and Ontology (SWON 2009)**

Research on Social Network Based on Meta-search Engine

Shen Yang, Liu Zi-tao, Luo Cheng, and Li Ye

An Approach of Semantic Similarity Measure between Ontology Concepts Based on Multi Expression Programming

Shixiong Xia, Zuhui Hu, and Qiang Niu

Stream Prediction Model Based on Tendency Correction

Fanrong Meng and Peng Zhuang

Study on the Grid Service Matching Based on Semantics

Meimei Liu, Qiaoming Zhu, Zhengxian Gong, Peifeng Li, and Yuhua Zhang
Workshop on Electronic Government Technology and Application (EGTA 2009)

Anchoring the Consistency Dimension of Data Quality Using Ontology in Data Integration .......................................................... 201
  *Chen Wei-Liang, Zhang Shi-Dong, and Gao Xiang*

A Framework for Personal Information Integration in Organizations ......................................................... 206
  *Cao Luhui, Li Qingzhong, and Gao Xiang*

Bring User Feedback into Keyword Search over Databases ........................................................................ 210
  *Zhaohui Peng, Jun Zhang, Shan Wang, and Changliang Wang*

**Author Index** ................................................................................................................................................. 215
